meters, and to install, operate, and maintain other Company property, and to determine the connected steam load, and to inspect if any unmetered service is being used. Failure to provide access for any of the above reasons may result in termination of service. Such right of access shall not be deemed to impose any duty upon the Company regarding the property of the customer.

Authorized Company employees and agents shall carry identification furnished by the Company and shall display it upon request.

10. CREDIT REQUIREMENTS

The Company may require the customer to make a reasonable cash deposit at any time to secure the prompt payment of the bills. The Company will pay interest on such deposits for the time the deposit is held by the Company and service is taken by the customer.

If at any time the Company deems any cash deposit to be inadequate, the customer may be required to make an additional deposit. Such deposits may be used to satisfy any unpaid balance on a closed account, but will not be applied to bills owing on an active account. Any remaining balance of a deposit and accrued interest will be returned to the customer upon termination of its service.

11. BILLING FOR SERVICE

Bills for service are rendered monthly. Meters will be read on a monthly basis on approximately the same day each month. Readings may be estimated when conditions warrant. Bills rendered on estimated readings have the same force and effect as bills rendered on meter readings. The Company may bill its customers in accordance with the Levelized Billing option at the election of the customer and approval by the Company.

12. LEVELIZED BILLING

For customers whose usage varies greatly from season to season, the Company offers a levelized billing payment option. Levelized billing will spread monthly payments evenly over a projected 12-month period based on the previous 12 months actual usage. Levelized billing will begin in May. Customers with less than 12 months of billing history will not be eligible.

13. PAYMENT FOR SERVICE

The customer is responsible for payment of all bills for service used until service is ordered disconnected and the Company has had reasonable time to secure a final meter reading. The Company will permit each customer at least 21 calendar days from the date of mailing of each bill for payment in full. Payment after due date will result in assessment of a late payment charge as specified in Rule 15. If customer's service is disconnected for any reason other than the customer's order to disconnect, the customer is responsible for payment of all outstanding bills for service.

The Actual SSCR Factor Billed shall not exceed the Maximum Allowable SSCR Factor for the corresponding month. During any month of the SSCR Plan year, the Company may elect to bill any SSCR factor equal to or less than the Maximum Allowable SSCR Factor for the corresponding month. The Maximum Allowable SSCR Factor for each month is calculated by summing the Base SSCR Factor and the Incremental Contingent SSCR Factor, if any, for the corresponding month.

The Base SSCR Factors listed in Table 34.1 contain a (\$0.00) per Mlb. under-recovery surcharge applicable from prior SSCR plan periods.

The listed SSCR factors are authorized pursuant to Rule No. 35; Steam Supply Cost Recovery Clause. The SSCR Factors are subject to adjustment pursuant to the Quarterly SSCR Factor Price Adjustment (Contingency) Mechanism as shown on Sheet Nos. 19.00 and 20.00. Sheet No. 16.00 will be updated if adjustments are made pursuant to this mechanism. The Commission is authorized to approve SSCR price adjustments contingent on future events pursuant to Section 6r(6) of 2008 PA 132.

The Company will file an application with the MPSC for SSCR factors applicable to the April 2017 through March 2018 period on or before December 31, 2016 pursuant to MCL 460.6r.

The Company will file a revised Sheet No. 16.00 at least three (3) business days prior to the commencement of each month.

The Steam Service Rate (\$ per Mlb.) for each month shall be equal to the sum of the Billed Steam Supply Cost Recovery ("SSCR") Factor and the Fixed Rate Element for the corresponding month as set forth in Table 34.1.

The SSCR Factor Ceiling for each month is calculated by summing the Base SSCR Factor and the Incremental Contingent SSCR Factor, if any, for the corresponding month as set forth in Table 34.2.

The Steam Service Rate (\$ per Mlb.) for each month shall be equal to the sum of the Billed Steam Supply Cost Recovery ("SSCR") Factor and the Fixed Rate Element for the corresponding month as set forth in Table 34.1.

Table 34.1						
Month	Year	Billed SSCR Factor \$/Mlb.	+	Fixed Rate Element \$/Mlb.	=	Steam Service Rate \$/Mlb.

The Billed SSCR Factor shall not exceed the SSCR Factor Ceiling for the corresponding month. During any month of the SSCR Plan year, the Company may elect to use any Billed SSCR factor equal to or less than the SSCR Factor Ceiling for the corresponding month. The SSCR Factor Ceiling for each month is calculated by summing the Base SSCR Factor and the Incremental Contingent SSCR Factor, if any, for the corresponding month as set forth in Table 34.2.

The Base SSCR Factors listed in the above table may contain a \$0.00 per Mlb. over recovery or under-recovery surcharge applicable from prior SSCR Plan Periods.

The listed maximum allowable monthly Steam Supply Cost Recovery (SSCR) factors are authorized pursuant to Rule No. 35, Steam Supply Recovery Clause and Standard Refund Procedures. The SSCR factors shown above are subject to adjustment pursuant to the SSCR Factor Ceiling Price Adjustment (Contingency) Mechanism as shown on Sheet Nos. 19.00 and 20.00 for the December 2008 through March 2009 period. Sheet No. 16.00 will be updated if adjustments are made pursuant to this mechanism. The Commission is authorized to approve SSCR ceiling price adjustments contingent on future events pursuant to Section 6r(6) of 2008 PA 132.

The SSCR ceiling factors, as adjusted pursuant to the SSCR Factor Ceiling Price Adjustment (Contingency) Mechanism as shown on Sheet Nos. 19.00 and 20.00, are the maximum rates the Company may charge. The actual rate in any month may be less than the SSCR factor ceiling.

The Company has filed for a ceiling Steam Supply Cost Recovery Factor and Ceiling Adjustment Mechanism for December 2008 through March 2009 in Case U-15636 currently pending before the Michigan Public Service Commission. Pursuant to MCL 460.6r, the Company will adjust its rates to incorporate all or part of the requested Factors as filed, including contingent factors, until the issuance of an Order in Case U-15636.

Company will file on or before December 31, 2008 for ceiling SSCR factors for April through March 2010 pursuant to MCL 460.6r.

c. Quarterly SSCR Factor Price Adjustment (Contingency) Mechanism

The SSCR Factors listed in Steam Rate Schedule, Rule 34, Sheet No. 16.00, may be increased on a quarterly basis for the remaining months of the SSCR Plan year, contingent upon a NYMEX Price Increase. A NYMEX Price Increase is calculated using the following formula:

$$\text{NYMEX Price Increase} = (\underline{X} - \underline{X}_{plan})$$

- \underline{X} = the simple average of the actual NYMEX monthly natural gas futures contract prices, (\$/MMBtu), for the remaining months of the SSCR Plan period (averaged over the first five trading days of the month prior to implementation).
- \underline{X}_{plan} = the weighted average of the natural gas futures prices incorporated in the calculation of the SSCR Plan for the remaining months of the SSCR Plan period. The averages for each month of the SSCR Plan year are listed at the top of the table on Sheet No. 20.00.

Prior to the beginning of each quarter the Company shall file a notice with the MPSC identifying the Incremental Contingent SSCR Factor to be included in the calculation of the Company's SSCR Factor Ceiling. See Steam Rate Schedule, Rule 34. The filing shall include all supporting documents necessary to verify the Incremental Contingent SSCR Factor, including the calculation of the five-day average of the NYMEX strip for the remaining months of the SSCR Plan year, and a copy of the published NYMEX futures price sheets for the first five trading days of the applicable month, such sheets being an authoritative source used by the gas industry.

Prior to the beginning of each quarter the Company shall file a notice with the MPSC identifying the Incremental Contingent SSCR Factor to be included in the calculation of the Company's SSCR Factor Ceiling. See Steam Rate Schedule, Rule 34. The filing shall include all supporting documents necessary to verify the Incremental Contingent SSCR Factor, including the calculation of the five-day average of the NYMEX strip for the remaining months of the SSCR Plan year, and a copy of the published NYMEX futures price sheets for the first five trading days of the applicable month, such sheets being an authoritative source used by the gas industry.

e Quarterly SSCR Factor Ceiling Price Adjustment (Contingency) Mechanism

The SSCR Factors listed in the table in Rule 34, Sheet No. 16.00, may be increased on a quarterly basis for the remaining months of the SSCR Plan year, contingent upon increases in the gas cost recovery ("GCR") factor applicable to the Company's natural gas purchases from its supplier above the GCR factor incorporated into the calculation of the SSCR Factor ceiling. Prior to the beginning of each quarter the Company shall file a notice with the revised SSCR Factors with the MPSC if the GCR increases to a level allowing for the implementation of a higher contingent SSCR Factor ceiling. The filing shall include all supporting documents necessary to verify the new SSCR Factor ceiling. The following Incremental Contingent Factors are authorized for the SSCR Plan period:

Case No. U-15636

(Continued from Sheet No. 19.00)

- (7) Interest on an overrecovery shall accrue at a rate equal to the Company's pre-tax overall authorized annual rate of return.

Interest will begin to accrue as of the first day of the earliest month in the Plan period being reconciled in which the Company has both: (i) a net cumulative overrecovery balance for such month; and (ii) a net cumulative overrecovery balance for every subsequent month in the Plan period being reconciled.

Subject to the sentence above, the amount of interest to accrue each month during the Plan period being reconciled will be determined by multiplying: (i) the quotient of: (a) the sum of the net cumulative principal balance at the beginning (excluding any interest) and end of each month (excluding any interest); divided by (b) two (2); by (ii) the quotient of: (a) the pretax overall authorized annual rate of return; divided by (b) twelve (12); provided however, that if (i) above is negative, no interest shall accrue that month. Interest due at the end of the Plan period being reconciled will be added to the overrecovery amount for purposes of accruing interest for the period after the conclusion of the Plan period. Post plan year interest will be compounded annually.

e. General Conditions

- (1) At least five business days prior to the commencement of the first billing cycle for the corresponding month, the Company shall give the MPSC Staff written notice of the actual factor to be billed to its customers.
- (2) If the Commission has not approved a new SCR plan by the end of the Company's previous plan, the Company may continue to use the approved SCR factor for the final month of the previous plan period.

(1) To SSCR Customers [Roll-in Methodology]

All supplier refunds allocable to SSCR customers shall be reflected as adjustments to the SSCR Cost of Steam Supply in the month received and should be included in "Purchased and Produced." Adjustments to prior year's SSCR under- or over-recoveries and any Commission-ordered disallowances associated with a prior SSCR period, along with all other refund liabilities will be reflected separately below the cost of steam sold line for the month of effect, in order that they may be included in the month-to-month rolling over/(under)-recovery balance for purposes of interest calculation.

The Company shall maintain records as to the source amount and timing of each roll-in component.

Interest shall be accrued on the month-to-month rolling over/(under)-recovery balance at the rates specified in 2008 PA 132.

- The steam cost recovery factor adjustment applicable to Detroit Thermal's SCR Factor is determined as follows: (i) Calculate the total increase in MichCon's maximum GCR Factor above the GCR Factor included in Detroit Thermal's Plan and, (ii) locate the corresponding incremental contingent steam factor (\$/Mlb) for the appropriate quarter and GCR increase in the above table. The corresponding incremental contingent steam factor is then added to Detroit Thermal's maximum SCR Factor to derive the new applicable maximum SCR Factor for the remainder of the Plan period, unless increased by a subsequent rise in MichCon's GCR.
