GCR QUARTERLY ADJUSTMENT PROCESS

The GCR factors listed on Sheet No. D-3.00 may be increased on a quarterly basis, for the remaining quarters of the August 2009 through March 2010 GCR Plan partial-year, contingent upon the NYMEX futures prices for natural gas increasing to a level above the level incorporated into the calculation of the GCR base price.

The Quarterly Adjustment Process monitors the GCR factor as compared to changes in the NYMEX. The Quarterly Adjustment Process is summarized as follows:

- A. At least fifteen days before the beginning of each quarter, i.e., June 15, September 15 and December 15, Presque Isle will, if it so chooses, file with the Commission an updated GCR price, less than or equal to the maximum authorized GCR factor, based on the impact of the NYMEX future prices for the remainder of the GCR period. The information filing will include all supporting documents necessary to verify the updated price, including a copy of the five-day average of the NYMEX strip for the remaining months of the GCR period, and a copy of the NYMEX future prices sheets for the first five trading days of the month, such sheets being an authoritative source used by the gas industry. The filing would be incorporated into the GCR Plan docket, Case No. U-15776 and provided with notice to Staff and all village and townships served by Presque Isle's Regulated Gas Division.

- B. If the impact of the NYMEX prices on remaining GCR plan year unpurchased volumes is to reduce the GCR plan price significantly, Presque Isle would have the ability to charge less than the maximum authorized GCR factor. If the impact of the NYMEX prices on remaining GCR plan year unpurchased volumes is to increase the GCR plan year base price by more than 5%, Presque Isle could prospectively adjust its GCR price to that level, but remaining equal to or less than the maximum authorized factor, subject to the annual reconciliation process.
