

Suggested Greenhouse Gas Emission Reduction Resources from Stakeholders to Support the Renewable Natural Gas Study

Received March 2022

1. "Comparison of Light-Duty Transportation Fuels Produced from Renewable Hydrogen and Green Carbon Dioxide." – 2018
 - Authored by: *Dominik Bongartz, Larissa Doré, Katharina Eichler, Thomas Grube, Benedikt Heuser, Laura E. Hombach, Martin Robinius, Stefan Pischinger, Detlef Stolten, Grit Walther, and Alexander Mitsos, Applied Energy*
2. "The Economics of Electrifying Buildings: How Electric Space and Water Heating Supports Decarbonization of Residential Buildings." – 2018
 - Authored by: *Sherri Billimoria, Leia Guccione, Mike Henchen, and Leah Louis-Prescott, Rocky Mountain Institute*
3. "The Cost of Reducing Greenhouse Gas Emissions." – 2018
 - Authored by: *Kenneth Gillingham and James H. Stock*
4. "Renewable Natural Gas Potential of Michigan Livestock Manure." – 2021
 - Authored by: *Dana Kirk, Michigan State University*
5. "Assessment of Residential Natural Gas & Electric Decarbonization in Lincoln, NE." – 2021
 - Authored by: *William Liss and Patricia Rowley, Gas Technology Institute*
6. "Levelized Cost of Carbon Abatement: An Improved Cost-Assessment Methodology for a Net-Zero Emissions World." – 2020
 - Authored by: *S. Julio Friedmann, Zhiyuan Fan, Zachary Byrum, Emeka Ochu, Amar Bhardwaj, and Hadia Sheerazi, Columbia University*
7. "Renewable Sources of Natural Gas: Supply and Emissions Reduction Assessment." – 2019
 - Authored by: *American Gas Foundation/ICF*
8. "Levelized Cost of CO₂ Mitigation from Hydrogen Production Routes." – 2019
 - Authored by: *B. Parkinson, P. Balcombe, J. F. Speirs, A. D. Hawkes, and K. Hellgardt, Royal Society of Chemistry*
9. "Renewable Natural Gas as a Climate Strategy: Guidance for State Policymakers." – 2020
 - Authored by: *Tom Cyr, John Feldmann, and Rebecca Gasper, World Resources Institute*
10. "Potential Cost-Effective Opportunities for Methane Emission Abatement." – 2015
 - Authored by: *Ethan Warner, Daniel Steinberg, Elke Hodson, and Garvin Heath, National Renewable Energy Laboratory, et al.*
