**RE: Upper Michigan Energy Resources Corporation and Michigan Gas Utilities
Comments in Case No. U-21170**

Dear Ms. Halloran:

The Upper Michigan Energy Resources Corporation (“UMERC”) and Michigan Gas Utilities (“MGU”) appreciate the opportunity to provide comments on, and be an active participant in, the development of the study being conducted into the potential for renewable natural gas (“RNG”) in the state of Michigan pursuant to Public Act 87 of 2021. UMERC and MGU support the effort into studying RNG potential and expressly support the development of RNG in the state of Michigan. RNG development is one of many valuable elements that will help to achieve the decarbonization goals and targets outlined in the MI Healthy Climate Plan.

Again, UMERC and MGU appreciate the opportunity to provide comments on this matter.

Sincerely,

A handwritten signature in blue ink, appearing to read "Richard F. Stasik".

Richard F. Stasik
