

EWR Low Income Workgroup 09/08/2022 - Chat

[8:59 AM] Susan Lindson

I am sorry I will need to jump off at 910 to join a strategic planning meeting.

[9:02 AM] Alexis Blizman

I can only stay until 9:30. I have another meeting. Sorry

[9:09 AM] Andrew McNeally

Madison, you mentioned plumbing repairs and conservation measures. Which have the biggest impact on water usage reduction?

heart 1

[9:11 AM] Martin Kushler

Would the home water usage analysis include provision of any low-cost conservation measures? (e.g., efficient showerheads, etc.)

[9:19 AM] Philip, Jerin (DHHS)

Did communities give any reasons for opting out?

[9:20 AM] Martin Kushler

Sorry if I missed this, but what is the funding source for WRAP? & do you have an annual budget target?

[9:28 AM] Andrew McNeally

On the income based plan - I missed whether the customer has to pay a min. of \$25 per month or if the credit is \$25 per month.

[9:30 AM] Shannon Burzycki (MGU) (Guest)

Is there a participation limit on this program?

The Definitions Subcommittee of the [Energy Affordability and Accessibility Collaborative \(michigan.gov\)](#) has proposed a definition of energy affordability and will be working on recommending a standard of energy affordability in cases that come before the Public Service Commission. For those interested, you may join the committee via this link: [EAAC Subgroup Sign-up Survey \(research.net\)](#)

Energy Affordability and Accessibility Collaborative

The Energy Affordability and Accessibility Collaborative is an open, working group committed to facilitating discussion and obtaining input from a broad range of stakeholders on existing and emergi...

The proposed definition reads: ***A household has the resources to meet their home energy needs for heating, cooling and other uses in a healthy, sustainable and energy efficient manner without compromising a household's ability to meet other basic needs.***
