

EWR LI Workgroup Chat – 06/01/23

[9:11 AM] Martin Kushler

Is there any kind of 'cost-effectiveness' test applied to these two EV pilots?

[9:13 AM] Synia Jordan

What's the percentage of EV owners live the underserved communities?

[9:15 AM] Tanya Paslawski

What's the average price of an EV? Used?

[9:26 AM] Synia Jordan

I'm interested in learning more about more for my small business parking lot in GR

[9:26 AM] Goldberg, Laura

is there work with MSHDA - Michigan State Housing Development Authority, or the utilities IQ MF programs? seems like there is a lot of opportunity to better integrate affordable housing Multifamily targeting with existing programs and work. Rather than a new stream of outreach, which may be part of the problem. Also encourage you to frame as affordable housing owners and residents - rather than as a sector/segment that is hard like 1

[9:26 AM] Goldberg, Laura

same pt as Andrew! 😊

[9:26 AM] Goldberg, Laura

plus question around MSHDA

[9:31 AM] Nicole hill

I'd like to know how low income customers would be concerned about ev charges when they are stuffing in many cases to afford their basic utility bills? And Detroit customers reside in one of Dte's worse service coverage area and can barely afford an Ev like 4

[9:35 AM] Nicole hill

We also have one of the worst outage areas perhaps that odor should be addressed before ev chargers power will go out for any reason the grid should be strengthened and prices should be affordable

[9:35 AM] Brett Steudle

brett.steudle@dteenergy.com

[Yesterday 9:37 AM] Nicole hill

Perhaps their should be more focus on low income customers and affordability versus guaranteeing a profit return for investors at the cost of customers who being, life, and health

[9:37 AM] Isabelle A Brogna

I will be signing off but, any follow up questions you can direct to Brett (email above) or myself at isabellebrogna@dteenergy.com. Thank you all!

[9:44 AM] Nicole Hill

Have you surveyed customers and asked why they feel these issues are occurring like 1

Particularly in low income communities of color

[9:47 AM] Wilkins, Mary (LARA)

Is the measure adjusted for seasonal factors, i.e., seasonal affectation disorder? At a six month marker, a person could be experiencing differences in mental health based on seasonal adjustments.

[9:49 AM] Nicole Hill

Was it addressed how the aforementioned communities are often strategically targeted to place industries in these communities that contribute to the dissemination and pollution of these communities as seen in 48217 the most polluted zip code in Michigan

[9:50 AM] Kamalay, Maddy (DHHS)

Jill, sorry if I missed it. What state was this located in?

[9:51 AM] Kamalay, Maddy (DHHS)

I hear you - Cincinnati, Ohio

[9:52 AM] Nicole Hill

I believe it's multi faceted and it's systemic that the utilities,MSHDA, and MDHHS work together, but seem to lack interagency communication to insure that all agencies are fulfilling their piece of the puzzle

[9:57 AM] Will (Green Projects Group) (Guest)

Well said Nicole.

[10:03 AM] Martin Kushler

Thanks for re-emphasizing that Maddy.

like 2 heart 1

[10:03 AM] Leigh Michael

Maddy: can you re-share how much \$ per home is covered under the current weatherization program in MI?

[10:06 AM] Schoenow, Kris (DHHS)

How was data collected? Home visit or phone call? When did you talk to people? Prior to Weatherization - 12 months after? How many people of the 400 Weatherization jobs responded?

[10:07 AM] Ben Dueweke

Hey Nicole - agree on the need for much more collaboration between entities (public/private/etc). There was a good conversation last fall between four groups providing coordinated home repair/energy efficiency services in Detroit. Definitely a big need for capacity building still, but this conversation made me hopeful that these programs are starting to align in a more strategic way:

heart 2

[10:11 AM] Schoenow, Kris (DHHS)

Thank you

[10:12 AM] Nicole Hill

Did weatherization seek intel from the communities as to what seemed to be the most vital needs?

[10:14 AM] Kamalay, Maddy (DHHS)

Standard "Weatherization" measures are very prescriptive and cannot be waived from. However, supplemental projects/measures may have flexibility with outside flexible funding.

[10:14 AM] Martin Kushler

Maddy, is anyone estimating what the current federal budget freeze being discussed this week in the debt ceiling legislation would do WAP capabilities?

[Yesterday 10:15 AM] Kamalay, Maddy (DHHS)

Kamalay, Maddy (DHHS)

Standard "Weatherization" measures are very prescriptive and cannot be waived from. However, supplemental projects/measures may have flexibility with outside flexible funding.

Prescribed by DOE.

[10:15 AM] Kamalay, Maddy (DHHS)

Martin Kushler

Maddy, is anyone estimating what the current federal budget freeze being discussed this week in the debt ceiling legislation would do WAP capabilities?

I have heard a few different things and it seems to be consistently moving. We are hopeful that we will get to a point where we aren't affected. At this point, nationally as states we aren't bracing for effects.

[10:24 AM] Field, Julia (DHHS-Contractor)
Will your work be published?

[10:24 AM] Martin Kushler
Great job, Jill. Brad, will you be able to share these slides?

[10:35 AM] Goldberg, Laura
survey coming soon re: LI EWR ideas for the next plans

[10:35 AM] Goldberg, Laura
look out via email!!

[10:36 AM] Goldberg, Laura
should be brief 😊 what ideas you have from this year of great LI EWR presentations and discussions

[Yesterday 10:39 AM] Goldberg, Laura
thanks brad and all!

[Yesterday 10:39 AM] Ross, Kari
thanks Brad + all!
