Would the energy audit education only be for commercial use type or any focused on multifamily/mixed-use housing?

Hi Jenna - when I put in my Detroit zip code it comes up with "City of Detroit" as electric utility. Should be DTE as City of Detroit does not have a muni utility

Some people have multiple utilities. Such as one for gas and one for electric. How could they select 2?

So I am assuming you only wish to promote the electrification incentives and not promote methane gas incentives, correct?

I 2nd what Ben said and to add to it I would say once our fuel switch program launch I wonder if we need to see the gas companies to see the benefits there?

I think Karen has a hand up and then I wanted to talk real quick if let's me.

What % of this is going to multifamily and how is that program going?

[10:17 AM] Brett Little (GHI) He/Him (Unverified)

If agencies are experiencing a lull in applications but others have now closed their application because they have too many, can you shift those to the other agencies to open things back up?

[10:21 AM] Ben Dueweke (Unverified)

I'm going to be *extremely* brief Brad
