

Hi Jesse! Great to see you at the meeting today. I'm looking forward to being part of the MPSC community again and engaging on the myriad of issues you all are tackling. In accordance with staff's request that stakeholders provide comments on the scope of the DG/Legacy Net Metering process, MEGA offers the following:

"MEGA appreciates the opportunity to offer high-level comments on the scope of the DG/legacy net metering stakeholder process. MEGA is aware of the comments filed by Consumers Energy and DTE and generally agrees with the main points that the law must be the basis for the discussions and nothing therein is appropriate to review or attempt to revise as part of the ongoing process. Further, issues related to customer compensation and credits are best addressed in individual utility tariffs and should not be included in the scope of the discussion."

Please let me know if you have any questions. See you soon.

Thanks and regards,

Tanya
