

INFORMATION TECHNOLOGY SERVICE UNIT LEADER (ITSL)

April 10 - April 14, 2023

Dimondale, Michigan

Location: MSP HQ, MPSCS Training Room, 7150 Harris Dr, Dimondale, MI 48821

This is a 4-day course beginning at noon on Monday, April 10 and ending by noon on Friday, April 14, 2023

There is no fee to attend. Students will need a device to download class materials and use during the course.

The requirement to access broadband data during incidents or events has increased exponentially in recent years. This has spurred the need for personnel with highly specialized knowledge and expertise to be included in the ICS during planned events and incidents. In 2018 and 2019, CISA introduced the ITSL course to establish the best way to integrate the ITSL into the ICS. The ITSL provides information management, cybersecurity, and application management for critical incidents and events.

Prerequisites

- A public safety agency affiliation with experience in providing information technology solutions to support public safety operations.
- Awareness of public safety broadband and wireless communication technologies.
- IS-100 Introduction to ICS
- IS-200 Basic ICS for Initial Response
- IS-700 An Introduction to NIMS
- IS-800 National Response Framework Intro
 - ICS-300: Intermediate ICS for Expanding Incidents
