<b>9. Project Results Summary</b>	As a result of the NEP, the Curry Neighborhood pedestrian path was constructed. The path increased neighborhood access to recreation, community amenities and increased walkability.
<b>What indicators were used to measure results?</b>	As there is no definitive way to measure usage of the trail, we have utilized visual observation of trail usage and comments on social media regarding usage and perception of new trails.
<b>How were the indicators measured?</b>	Through monitoring of social media sites and contact with the local housing authority.
<b>What were the findings of the measurements including baseline data?</b>	There was no previous non-motorized access between miners park and the little league field.
<b>What Lessons were Learned?</b>	We have learned how important it is to collaborate and leverage matching funds to have more successful community development projects and to work with partnering organizations to more efficiently implement projects.
