

Upper Peninsula 9-1-1 Authority's ESInet Project

Providing 9-1-1 Services in the Upper Peninsula

Gary Johnson, ENP Manager
Marquette County Central Dispatch

Thom Sumbler
PFN Sales and Business Development

UP 9-1-1 Authority's ESInet Project

- History of the UP 9-1-1 Authority
 - Established in 2009
 - Inter-local Agreement Signed by all 15 Counties
 - Formed using the Urban Cooperation Act
 - Each County appoints a representative to the Authority
 - The Upper Peninsula Commission for Area Progress (UPCAP) is the Authority's Secretary/Administrative Agent

UP 9-1-1 Authority's ESInet Project

- Governance provided by the Authority
 - Contract signatory
 - Owns the Equipment
 - Single point of contact for vendors
 - Committee Structure
 - Technical Committee
 - Dispatcher Training Committee
 - Others as needed

UP 9-1-1 Authority's ESInet Project

- Public/Private Partnership
 - Formed early on with Peninsula Fiber Network (PFN)
 - Vital to Project Success
 - Communication exchange between Authority & PFN
 - No unrealistic time frames set was kept a moving target
 - Commitment from UP Authority
 - Letter of Intent
 - Letter of Authorization
 - Commitment from PFN
 - Was a Win/Win for the Authority & PFN

UP 9-1-1 Authority's ESInet Project

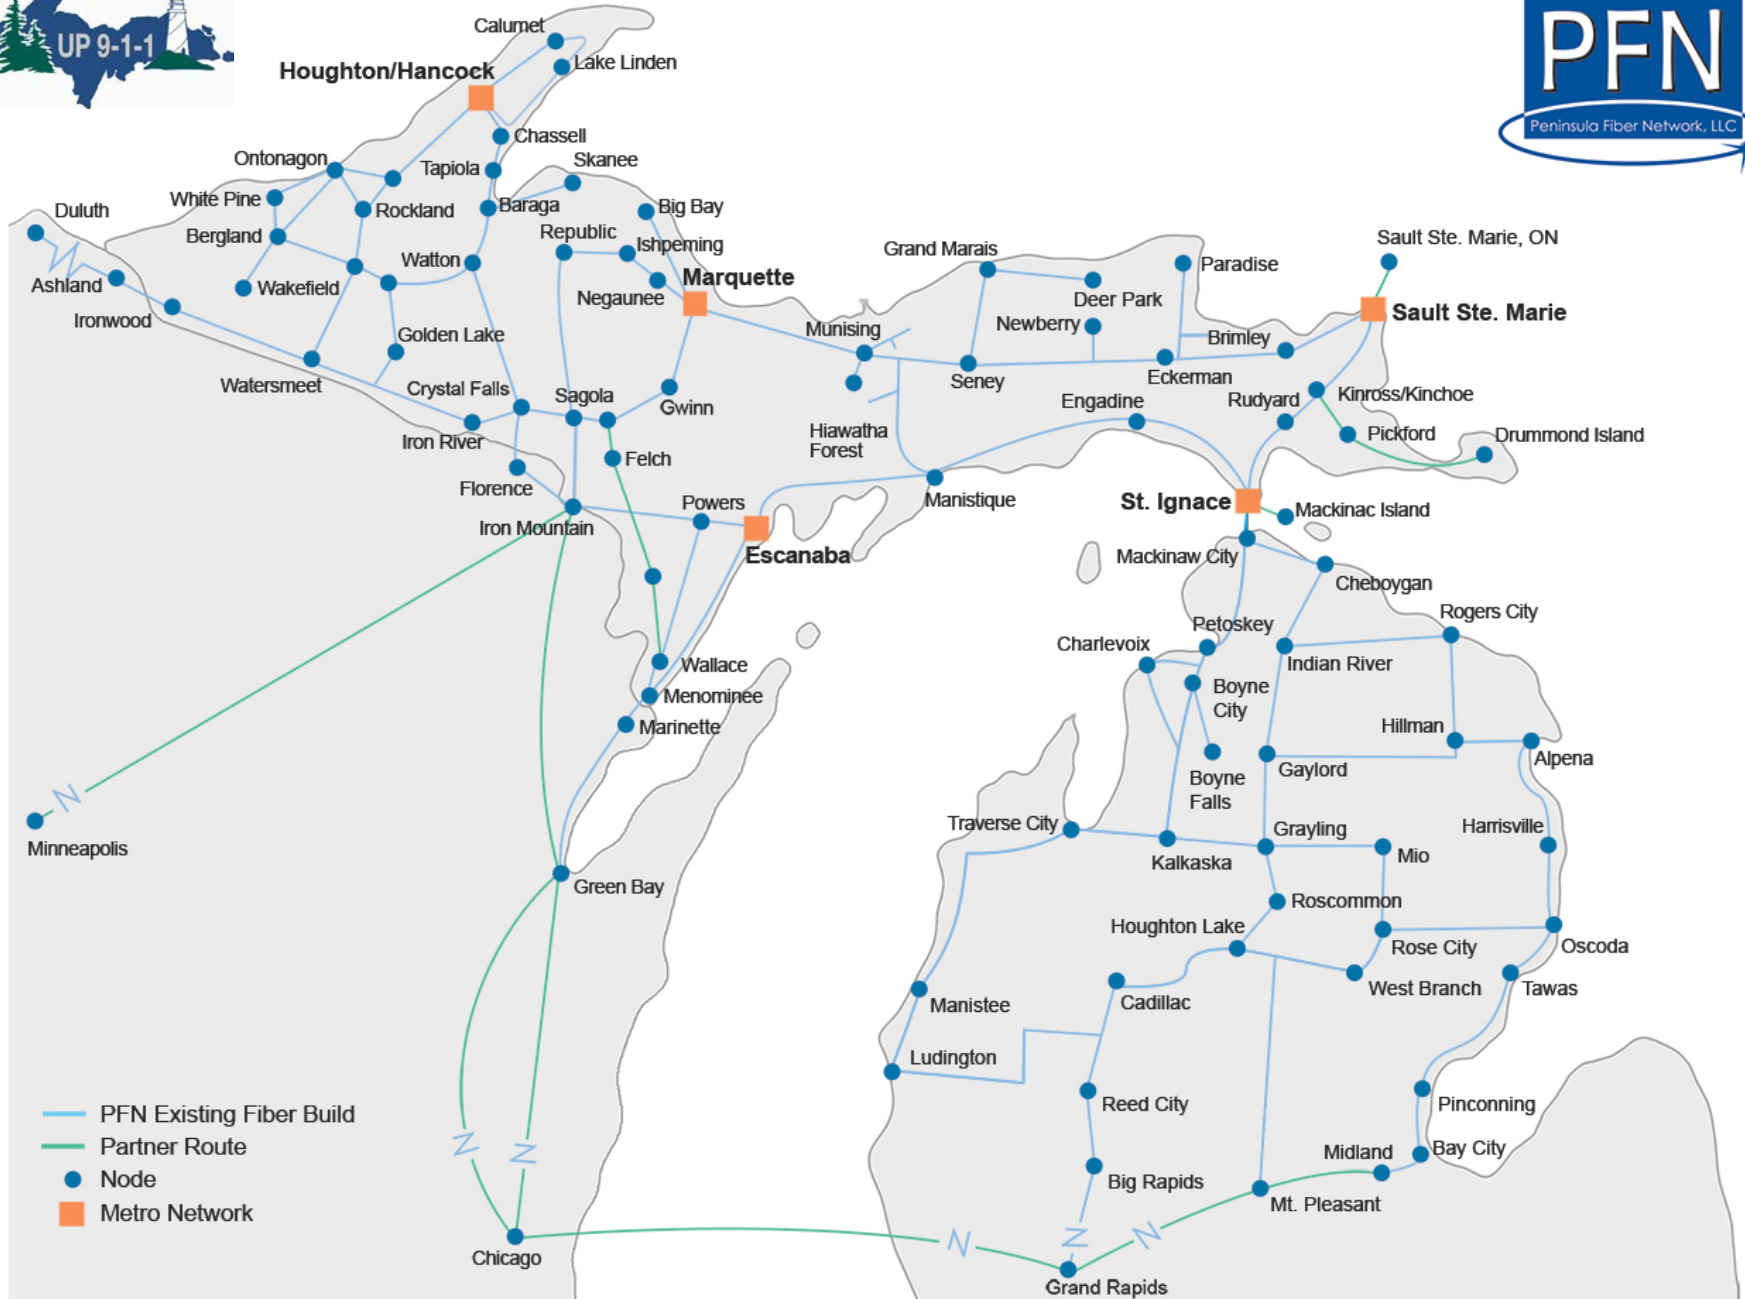

- All 15 UP counties worked cooperatively
- Serving area – 16,377 square miles
- Population served – 311,377
- 8 PSAP's
- 7 PSAP's share same CAD system

Next Generation Functional Elements

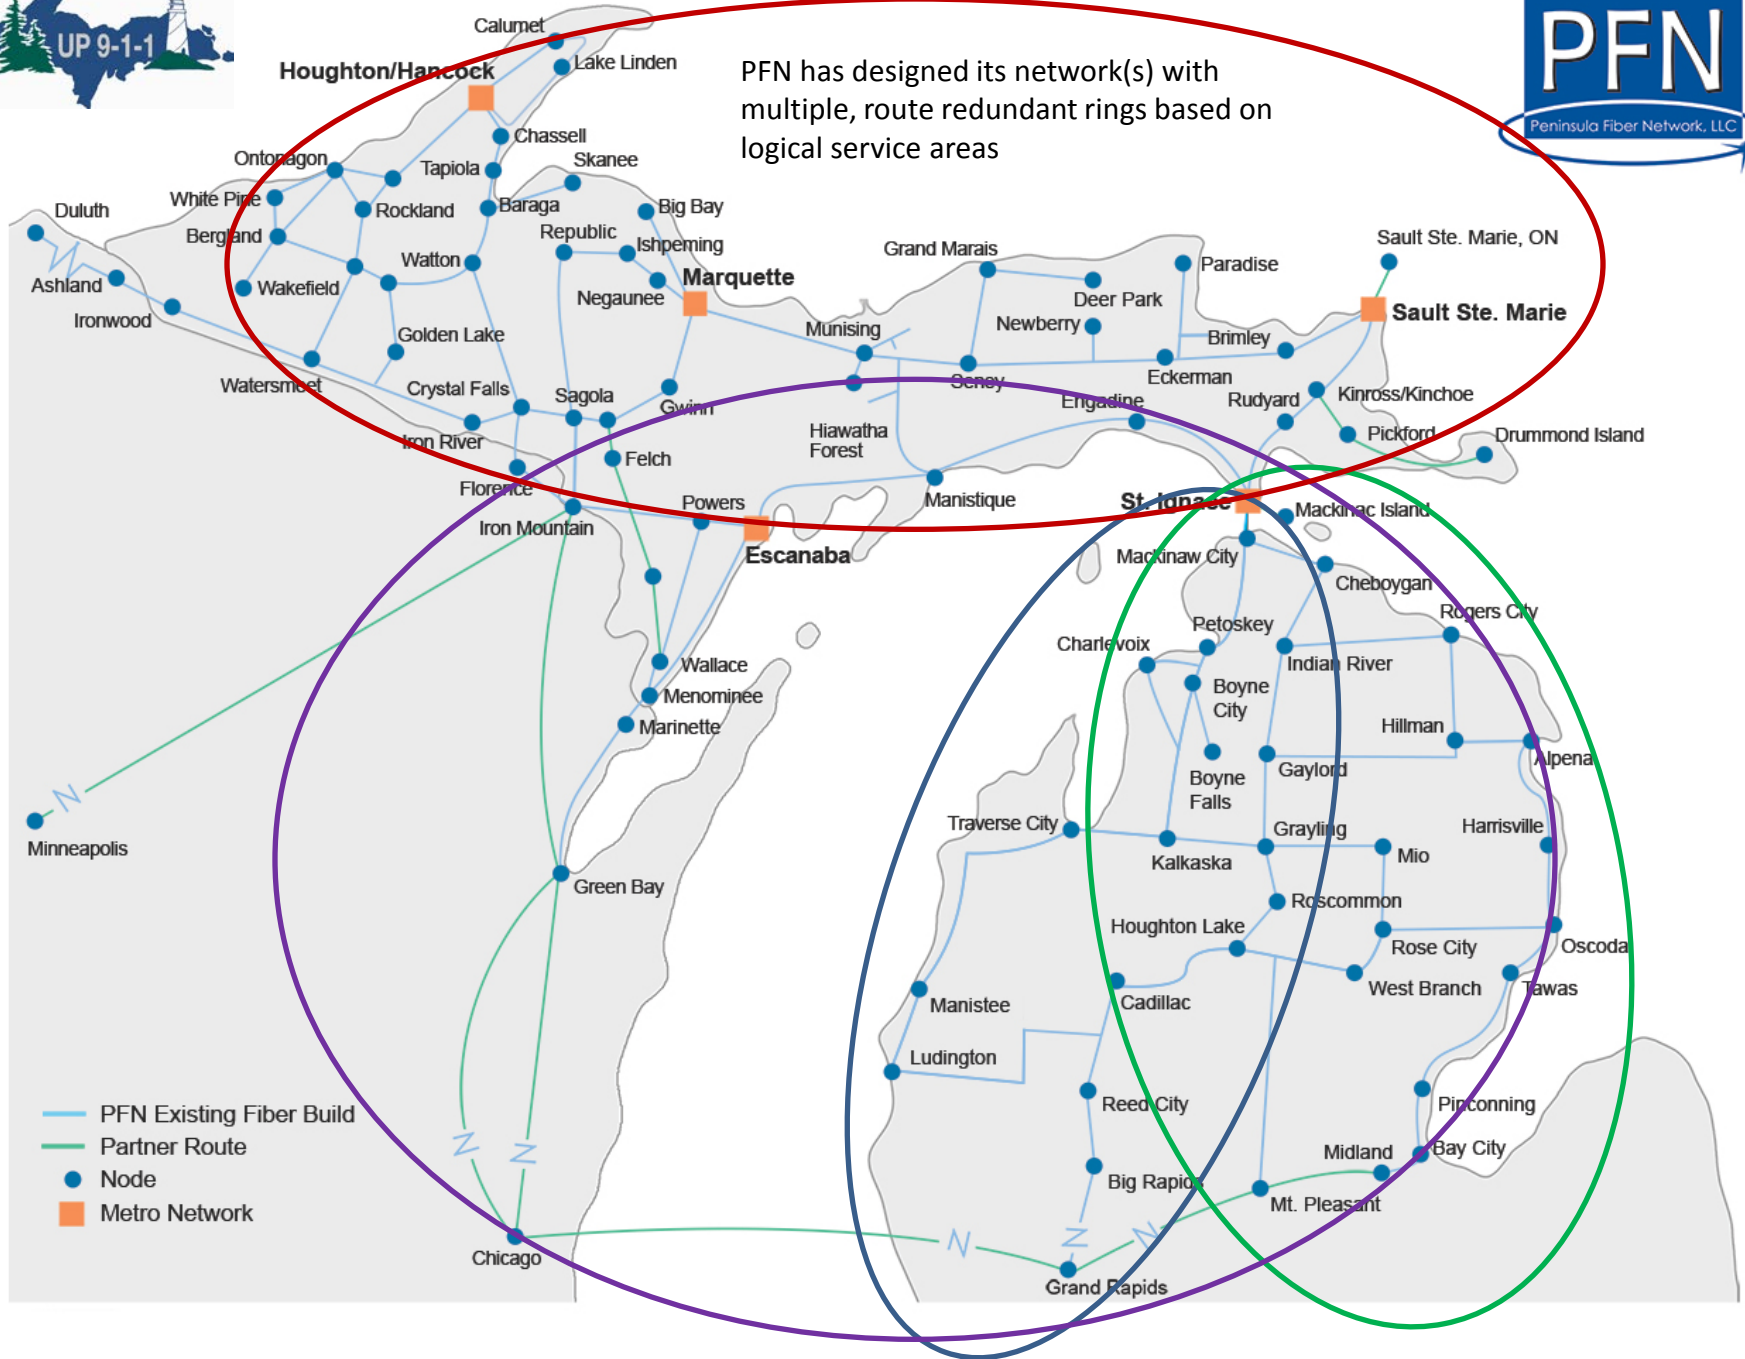

- FCC 911 Reliability Report and Order mandates that a 911 network must be “redundant, resilient and reliable”
- PFN designed its network to ensure that all the FCC conditions have been met or exceeded for 911 applications
- Network, ESRP, ALI Database provider all meet the “redundant, resilient and reliable”
- The UP 911 Authority project will combines all of those to deliver 911 calls and transport CAD sharing
- PFN and INdigital have committed long-term to 911 network deployment

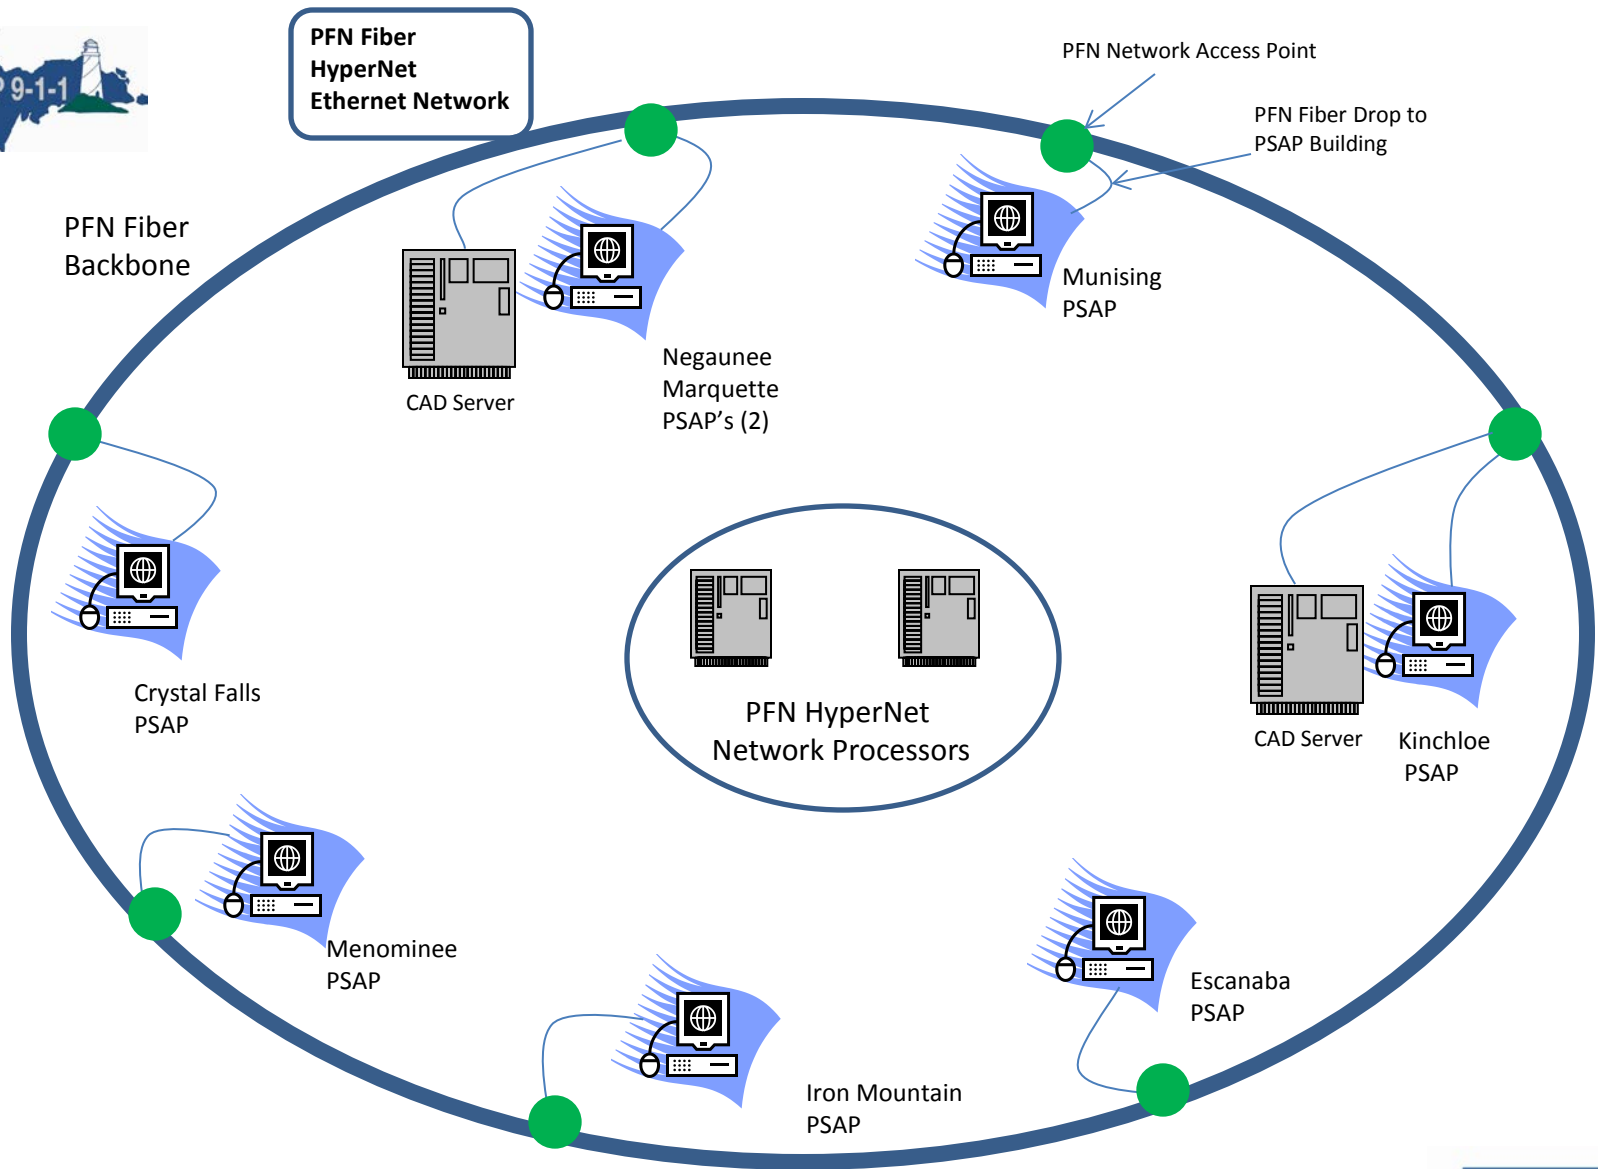

PFN has designed its network(s) with multiple, route redundant rings based on logical service areas

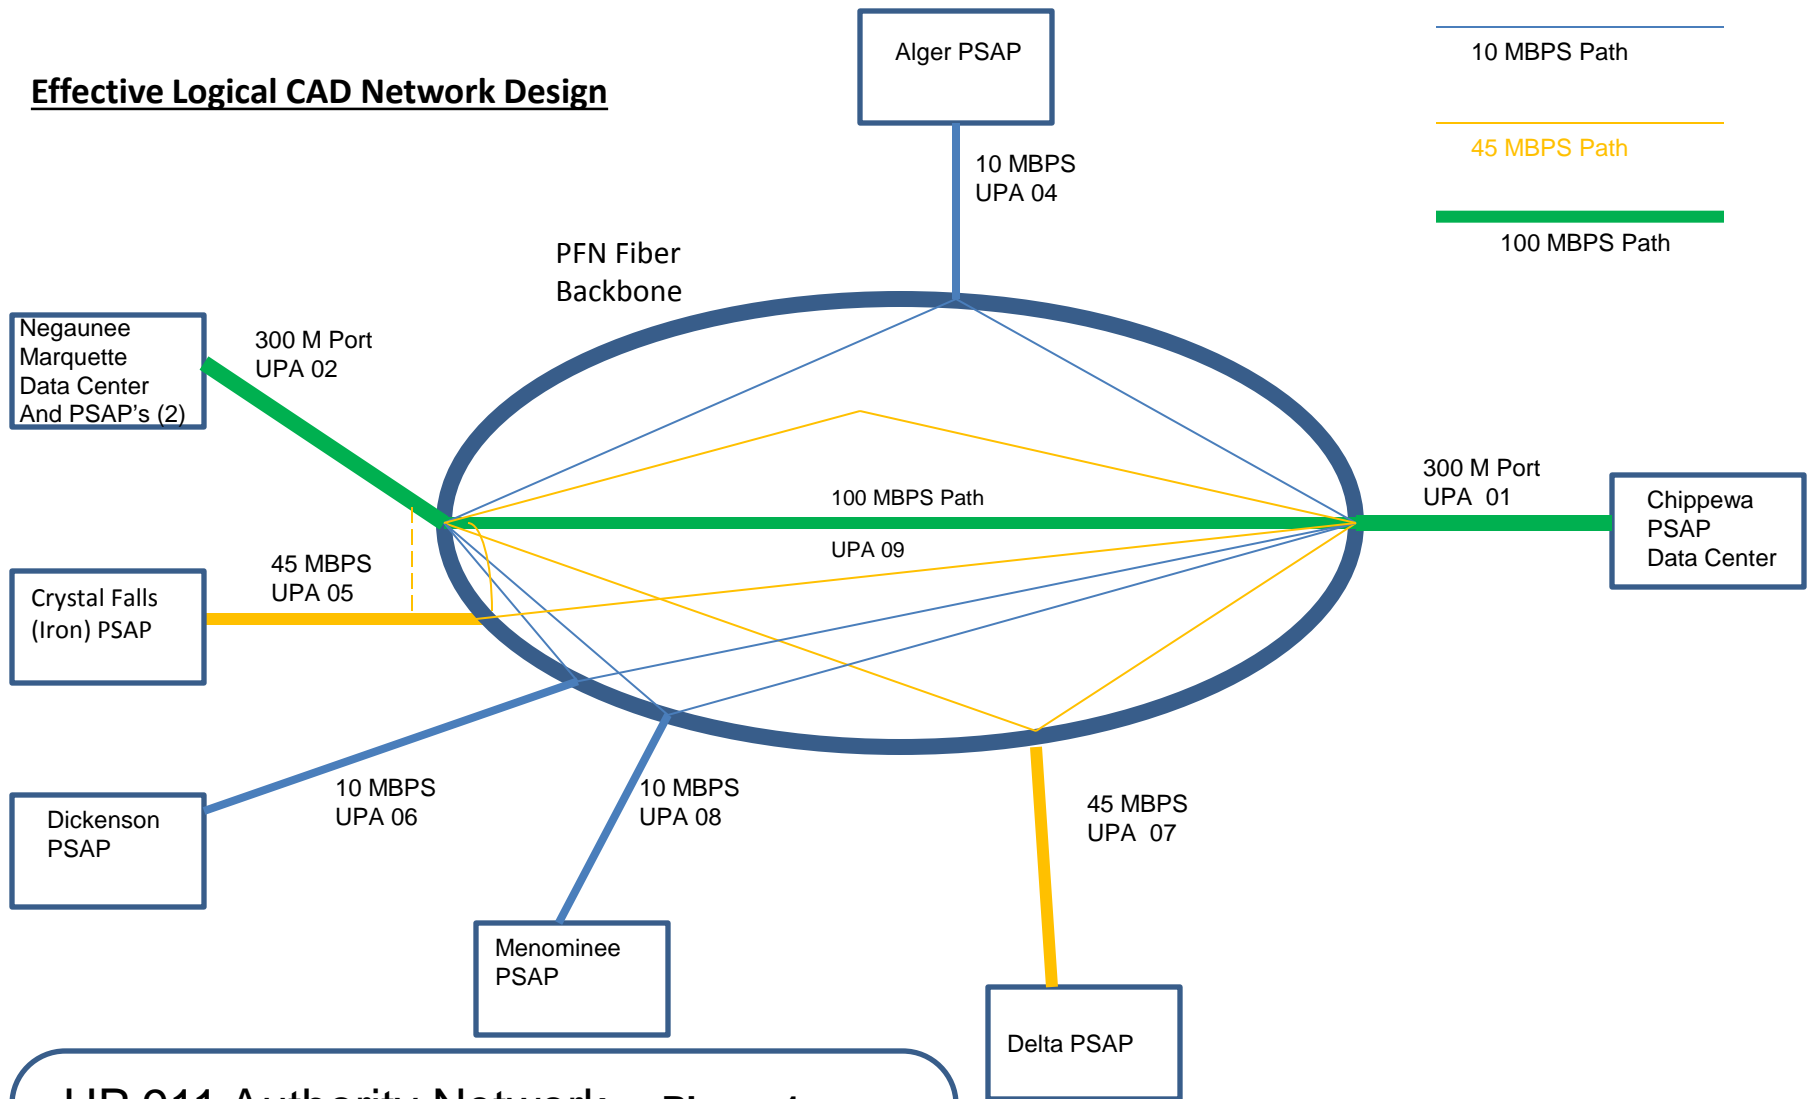

UP 911 Authority Network

PSAP Core Network

Effective Logical CAD Network Design

UP 911 Authority Network – Phase 1

UP 911 Contacts: Tim McKee 906 495 7488 / Gary Johnson 906 475 1196

Dave McCartney – PFN GM – 906 226 2010

Bill Tidd – Network Manager (OSP Transport) 906 387 0043

Todd Proehl – (IP Engineering) 906 226 2010

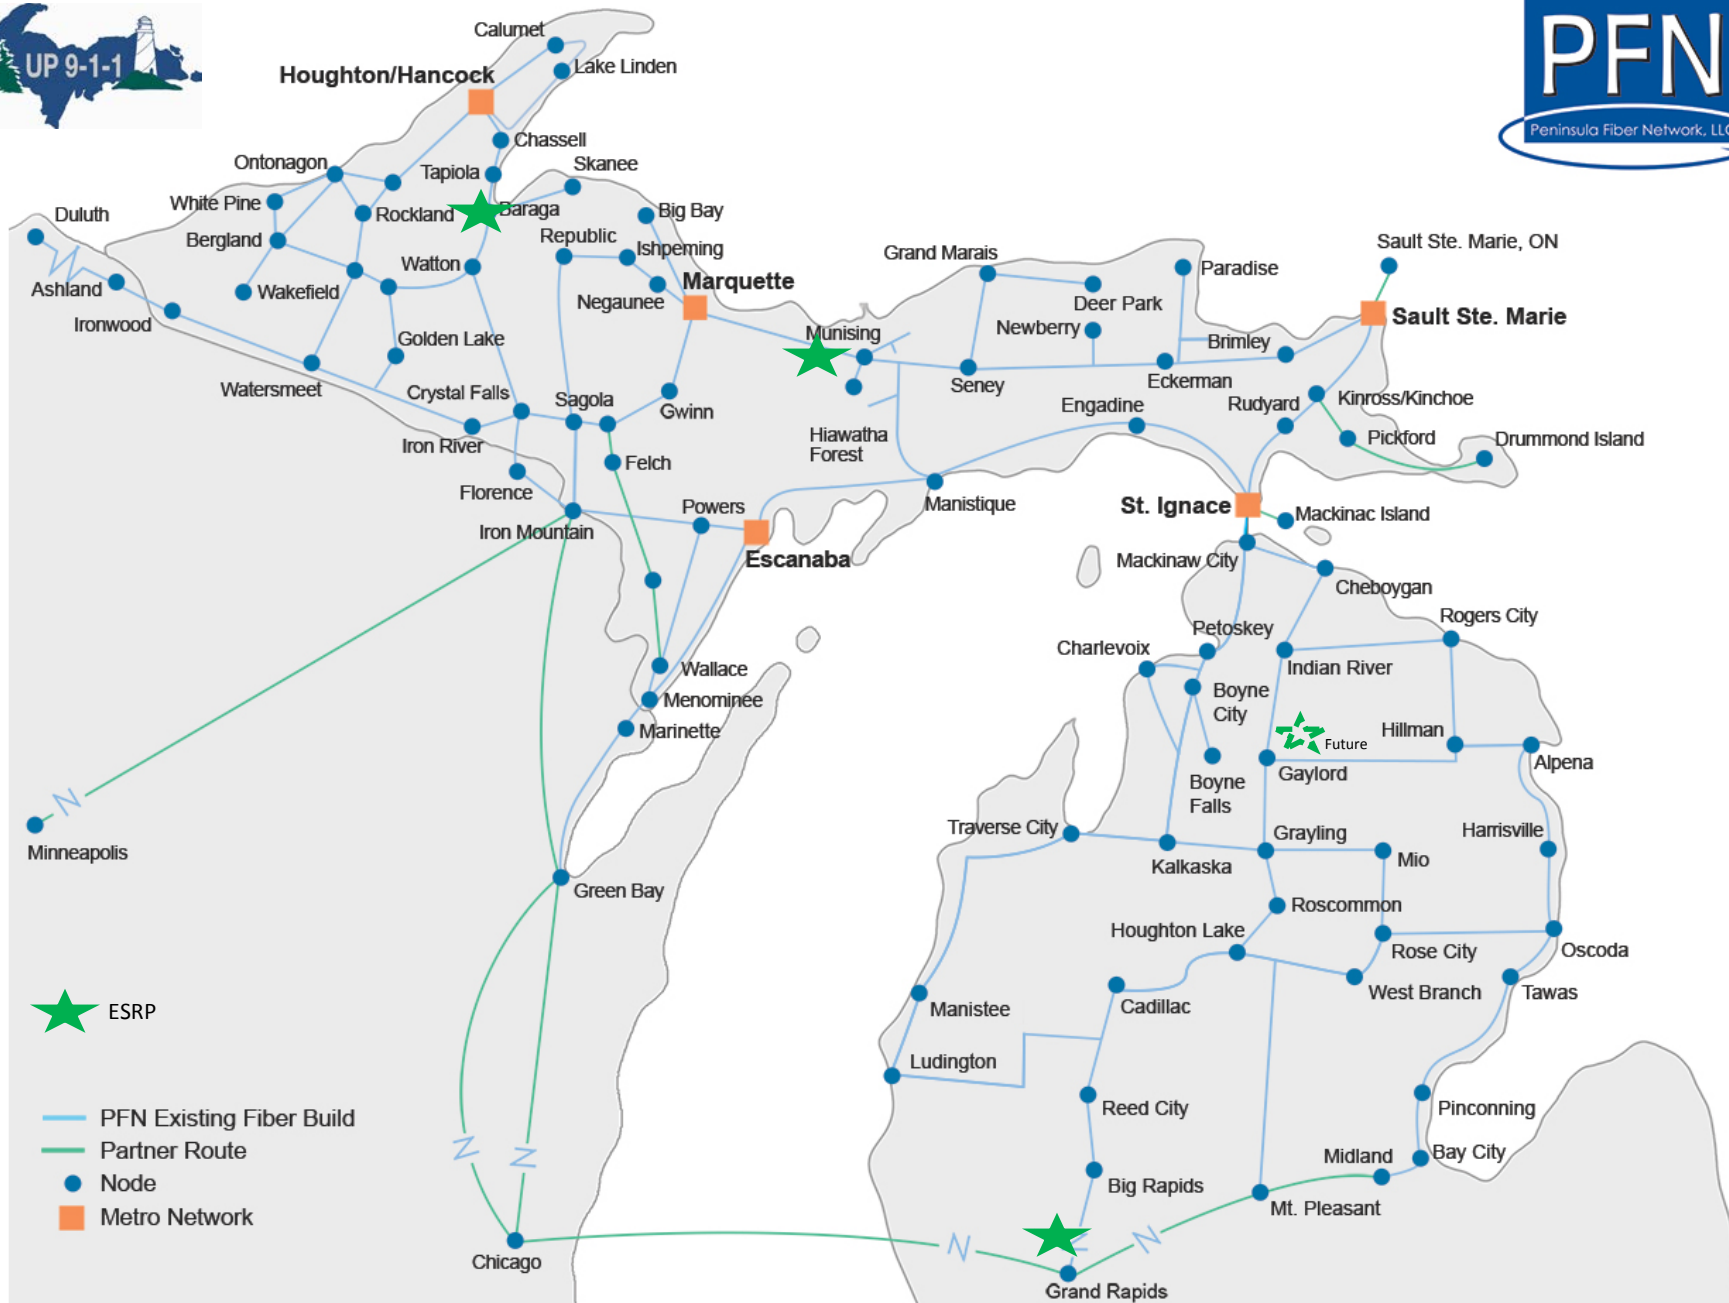

UP 911 Authority Network

ESRP Interconnected Core Network

UP 911 Authority – Project

- Presented the concept to all 15 county boards
- Obtained approval and authorization to make changes to their 911 system configuration
 - Resolution to each county's 911 plan
 - Letter of agency allowing change of 911 carrier
 - PFN provides documents for the county's use
- Coordination with the MPSC
- Coordination with existing 911 service provider

UP 911 Authority Project Continued

- Coordination of all required components
 - Network provider – PFN
 - ESRP technology within PFN network – INdigital
 - CPE provider – Intrado
 - Digital recording provider (3)
 - County MSAG coordinators (7)
 - ILEC's (9)
 - CLEC's / VoIP (9)
 - Wireless operators (5)

NextGen 911 Enhanced Features

- Suite of **non-voice** features

- “Textty” – ability for PSAP’s to send and receive text
- “T.im” – instant messaging for text, pictures and video
- Interconnection to “*other data services*”
 - Onstar, video surveillance, license plate recognition, etc

- Other new services as the become available

- The nature of this network system is that it will allow integration of new features and enhancements as they are developed
- This NextGen network will continue to be upgraded as technology develops

Network Resiliency

- Marquette County 9-1-1 call flow prior to ESInet
 - Six 9-1-1 trunks
 - Single Selective Router for entire UP
 - Negaunee Regional Dispatch common equipment
 - Marquette City PD overflow & back-up PSAP
 - Backhoe fade impact

Network Resiliency

- Marquette County 9-1-1 call flow on ESInet
 - Six IP “trunks”
 - Two ESRP’s
 - Auto call rollover to Negaunee Regional Dispatch
 - Back-up phone (MEVO) at each workstation – includes ANI/ALI
 - Backhoe Fade eliminated– Fully ringed network
 - Alternate Routing
 - On the IP network
 - If Network is unavailable (Charter Connection for Mqt Co)
 - Auto Alternate route to Chippewa County Central Dispatch
 - Re-route 9-1-1 calls to back-up PSAP Marquette City PD
 - On the PSTN (Tertiary 9-1-1 Route)

PSAP Toolkit

- calls per month
- calls per type
- map display of calls
- ALI Tools
- Call detail records
- MSAG manager
- trouble ticketing
