

Policy B

Transfer of Emergency Information Between Public Safety Answering Points

Amended by ETSC 9/26/01

When a Public Safety Answering Point (PSAP) or emergency dispatch agency receives information of an emergency, or possible emergency, and the location is outside of their jurisdictional boundaries, the information will be immediately relayed to the appropriate PSAP via telephone or direct radio contact, or electronic means with the capability of immediate confirmation of receipt. The information should not be sent via LEIN as this may result in critical delays.
