

## ***Customer Bulletin – January 23, 2023***

The MSP Forensic Science Division (FSD) has removed Beverage Alcohol Testing from its accredited testing services in the Toxicology Unit. As of Monday, February 6, 2023, those submissions will no longer be accepted for testing.

FSD laboratories receive fewer than five of these cases per year, and this volume is not sufficient to maintain the program or justify its cost.

Should any law enforcement agency need testing for Beverage Alcohol, the MSP Toxicology unit can recommend an accredited private laboratory to perform the test for a small fee. For further information, you may contact the Lansing Toxicology Unit by calling the Lansing Laboratory at (517) 284-3491.
