

Customer Bulletin – August 22, 2025

The Michigan State Police (MSP) Forensic Science Division (FSD) purchases and distributes Biological Specimen Kits for the collection of blood and/or urine intended for alcohol and drug analysis by the Toxicology Unit. The MSP FSD Toxicology Unit will continue to analyze blood samples for both alcohol and drugs but is **discontinuing drug analysis for urine samples**. Alcohol analysis for urine samples will continue to be offered by MSP FSD.

Law enforcement, and other agencies, utilizing the Biological Specimen Kit should continue to collect urine samples for submission to the laboratory if alcohol or drug analysis in urine is required. If drug analysis in urine is required, the Toxicology Unit will facilitate the sending of the urine sample to the laboratory of choice. The agency will incur the cost of analysis as well as any applicable expert testimony required.

For additional information regarding the collection and analysis of urine samples, please contact:
