# History and Overview

## WHAT IS THE AUTOMOBILE THEFT PREVENTION AUTHORITY?

In the mid-1980s, Michigan had the highest motor vehicle theft rate in the nation. Members of the Michigan Anti Car Theft (ACT) Campaign Committee developed a concept that would combine the efforts of law enforcement, communities, and businesses against motor vehicle theft.

In 1986, Michigan's Governor and the Legislature decided to try the ACT committee's idea. So began one of Michigan's most effective weapons against the crime of motor vehicle theft, the Automobile Theft Prevention Authority (ATPA).

The ATPA was established with a sunset provision that automatically abolished the program unless it was renewed by the Legislature. The purpose of the sunset provision was to ensure that the program, created as an experiment in law enforcement, was doing its job as intended.

In 1992, the Governor and Legislature agreed the ATPA should become a permanent state authority, housed under the auspices of the Michigan State Police. The legislation was overwhelmingly passed in both the House and Senate.

## HOW IT WORKS:

The ATPA is funded by an annual \$1 assessment on each insured motor vehicle, plus interest earned by investing those funds. Prior to 2017, assessments were collected only on private passenger vehicles; Commercial vehicles assessments were added in 2017.

It is overseen by a seven-member board of directors appointed by the Governor, which includes representatives of law enforcement, automobile insurers, and consumers of motor vehicle insurance.

Each fiscal year, the board reviews grant applications that have been submitted by law enforcement entities, prosecutors offices, and non-profit organizations. The board approves grant funding for one or more of the following purposes, all of which are associated with combating auto theft: investigating, apprehending, prosecuting, and deterring.

Finally, the ATPA board members and staff are involved in long-range planning. Regular meetings provide updated goals and objectives for fighting motor vehicle theft.

## IMPACT ON MOTORISTS:

The return on investment (ROI) of ATPA funds for fiscal year (FY) 2023 was \$10.45 for every \$1 spent. In FY 2022, the ROI was \$10.30 and in FY 2021 it was \$9.02.

# ATPA Teams Motor Vehicle Theft Data

Motor vehicle thefts have declined nationwide as newer vehicles utilize high-tech anti-theft devices making vehicles more difficult to steal. Anti-theft devices include smart keys containing computer chips required to start the vehicle, kill switches, and devices that disable starters. Due to these trends, carjacking, stolen wheels and tires, and fraud cases have been on the rise. Simultaneously, motor vehicle theft arrest rates have also declined, while the recovery value of stolen vehicles has increased.

## OCAT

Oakland County Auto Theft (OCAT) wrapped up a long investigation with the arrest of a suspect in seven car thefts from dealerships. Oakland County deputies were dispatched to the LaFontaine Dealership in Highland Township to take an Unlawful Driving Away of an Automobile (UDAA) report on a 2022 Corvette. The theft occurred when two individuals swapped the Corvette key fob for a dummy fob. Following distribution of a criminal intelligence bulletin to other law enforcement agencies, OCAT detectives were contacted by the Washtenaw County Sheriff's Office, the Waterford Special Investigations Unit, and the Sterling Heights, Bloomfield Township, Southfield, and Farmington Hills police departments with reports of stolen vehicles from dealerships in those jurisdictions using the same method of key swapping.

During the investigation, detectives discovered that one of the suspects was on a home confinement tether which allowed them to use GPS coordinates to place him at the locations of UDAA's in multiple jurisdictions. A search warrant was obtained for the call detail records (CDRs) of the suspects. The Oakland County Sheriff's Office Computer Crimes Unit used the CDRs to plot their locations at the dates and times of the UDAA's. The Oakland County Prosecutor's Office issued a warrant for one count of continuing criminal enterprise, five counts of UDAA, and one count of receiving and concealing stolen property for each suspect. As OCAT detectives actively searched for the accused subjects, they were called to conduct surveillance at BMW of Farmington Hills based on the larceny of a key fob.

During surveillance, detectives observed a male exit the passenger side of a Camaro and enter a BMW with the swapped key fob. The suspect was apprehended and identified as one of the suspects for whom they had received a warrant. The suspect was lodged at the Oakland County Jail on multiple warrants and is currently being held on a \$500,000 cash/surety bond with a GPS tether prior to release from the jail. The second accused has not yet been apprehended. Five of the seven vehicles the pair had been suspected of stealing have been recovered.

## Michigan Association of Vehicle Theft Investigators Training Event

The ATPA in conjunction with the Michigan Association of Vehicle Theft Investigators (MAVTI) created and conducted the first ever Auto Theft Team Investigator School held at the Ingham County Sheriff's Office in Mason, Michigan, on October 17-18, 2023. The training event was attended by 32 auto theft investigators who were then assigned to the nine ATPA grant-funded auto theft teams.

This ATPA-MAVTI Auto Theft Team School is an effort designed to provide the same training to each officer assigned to an ATPA auto theft team or task force, focusing specifically on newly assigned officers that have not had the opportunity for this type of technical training prior to an assignment to an ATPA auto theft team or task force. MAVTI instructed multiple modules of this training and ATPA staff facilitated by bringing in subject matter experts for additional training modules. This team training concept consists of Phase 1 and Phase 2, with each phase lasting two calendar days and each phase being independently MCOLES approved.
