History and Overview

WHAT IS THE AUTOMOBILE THEFT PREVENTION AUTHORITY?

In the mid-1980s, Michigan had the highest motor vehicle theft rate in the nation. Members of the Michigan Anti Car Theft (ACT) Campaign Committee developed a concept that would combine the efforts of law enforcement, communities, and businesses against motor vehicle theft.

In 1986, Michigan's Governor and the Legislature decided to try the ACT committee's idea. So began one of Michigan's most effective weapons against the crime of motor vehicle theft, the Automobile Theft Prevention Authority (ATPA).

The ATPA was established with a sunset provision that automatically abolished the program unless it was renewed by the Legislature. The purpose of the sunset provision was to ensure that the program, created as an experiment in law enforcement, was doing its job as intended.

In 1992, the Governor and Legislature agreed the ATPA should become a permanent state authority, housed under the auspices of the Michigan State Police. The legislation was overwhelmingly passed in both the House and Senate.

HOW IT WORKS:

The ATPA is funded by an annual $1 assessment on each insured motor vehicle, plus interest earned by investing those funds. Prior to 2017, assessments were collected only on private passenger vehicles; commercial vehicle assessments were added in 2017.

It is overseen by a seven member board of directors appointed by the Governor, which includes representatives of law enforcement, automobile insurers, and consumers of motor vehicle insurance.

Each fiscal year, the board reviews grant applications submitted by law enforcement entities, prosecutors offices, and non-profit organizations. The board approves grant funding for one or more of the following purposes, all of which are associated with combating auto theft: investigating, apprehending, prosecuting, and deterring.

Finally, the ATPA board members and staff are involved in long-range planning. Regular meetings provide updated goals and objectives for fighting motor vehicle theft.

IMPACT ON MOTORISTS:

The return on investment (ROI) of ATPA funds for fiscal year (FY) 2025 was $7.88 for every $1 spent. In FY 2024, the ROI was $7.97. The ROI is calculated by the amount of money granted to participating agencies divided by the value of vehicles and equipment recovered by the funded participants.

ATPA Teams Motor Vehicle Theft Data

Newer vehicles now utilize high-tech anti-theft devices making vehicles more difficult to steal, such as smart keys containing computer chips required to start the vehicle, kill switches, and devices that disable starters. However, key reprogramming, carjacking, stolen wheels and tires, and fraud cases have been on the rise. Simultaneously, motor vehicle theft arrest rates by ATPA-funded teams have increased, while the recovery value of stolen vehicles has increased.

ATPA Success Stories

Macomb Auto Theft Squad (MATS)

Since February 2025, MATS has investigated 87 reports of Ram truck infotainment systems being stolen in Macomb County. A number of victims reported theft of infotainment systems from their same vehicle on more than one occasion. MATS detectives initiated surveillance on two suspects identified in the break-ins. While conducting surveillance in Madison Heights and Troy, detectives observed the suspects breaking into several Ram trucks and stealing infotainment systems. The detectives maintained surveillance and followed the suspects' vehicle until both individuals exited at a local eatery in Detroit. Detroit's Commercial Auto Theft Squad (CATS) and Oakland County Auto Theft (OCAT) were notified and assisted with taking both suspects into custody in Oakland County. Search warrants will be obtained for their cell phones to link them to the thefts in Macomb County.

Genesee Auto Theft Investigation Network (GAIN)

In September 2025, GAIN began a joint investigation with the Shiawassee County Sheriff's Department and the Grand Rapids Police Department's Combined Auto Theft Team (CATT) on an alleged chop shop operation. GAIN received a tip on a chop shop operation in Shiawassee County involving suspects from the Flint and Grand Rapids areas. A suspect in Shiawassee County was working with a suspect in Grand Rapids to have stolen Dodge Challenger vehicles transported to a Shiawassee address, where chassis of the vehicles were removed and placed into vehicle shells purchased from auctions. The swapped vehicles were then sold on social media sites. On September 26, 2025, the Shiawassee County Sheriff's Department received information from the Lansing Police Department that a Hellcat was pinging on a tracker at the suspect's address in Shiawassee County. This information, along with the information obtained from the tipster, led to the authorization and service of a search warrant for the property. The execution of the search warrant resulted in the recovery of multiple stolen vehicles and stolen vehicle parts. The vehicles and parts were reported stolen out of Lowell, Flint, and Grand Rapids, as well as Chicago, Illinois. One of the stolen vehicles was in the process of having the confidential VIN replaced on the vehicle. The donor vehicle was also recovered on this same property. This investigation is still ongoing. The information obtained from this investigation has contributed to other active investigations in Grand Rapids, Flint, and Shiawassee County.
