

TECH FOR YOUR TEEN

There's a wide array of tech tools you can use to **keep your teen driver safe and enforce good driving habits**, from apps that limit their phone use to programmable keys that limit their speed.

STUDY ON DRIVER SAFETY TECHNOLOGIES FOR TEENS

The Insurance Institute for Highway Safety (IIHS) published a study in 2021 on the potential effectiveness of teen-specific and other driver safety technologies. The study found that if these technologies were universally used, they could prevent 41% of all teen driver crashes, and 78% of teen driver deaths. [LEARN MORE ABOUT THE STUDY.](#)

CHOOSING A VEHICLE FOR YOUR TEEN DRIVER

- [IIHS WEBSITE](#)
- [NHTSA WEBSITE](#)

IF YOUR TEEN WILL BE DRIVING THEIR OWN VEHICLE, FOLLOW THESE TIPS FOR CHOOSING THE SAFEST RIDE.

DO:

- Choose a vehicle with Electronic Stability Control
- Choose a vehicle with the best crash test rating possible [check both [IIHS](#) and [NHTSA ratings](#)]
- Choose bigger, heavier vehicles
- Check the IIHS database of recommended used vehicles for teen drivers
- Complete supervised practice with your teen using the vehicle's features before they drive alone

DON'T:

- Choose a vehicle with high horsepower that may encourage your teen to speed
- Choose a vehicle with a high rollover factor [check [IIHS ratings](#)]
- Choose a vehicle with open recalls [check VIN for recalls at [NHTSA.gov/Recalls](#)]
