

2023 Michigan State Police Crime Clearance and Crime Count Comparison Report

Data contained within this report represent crime reported by the Michigan Department of State Police to the Michigan Incident Crime Reporting (MICR) Program as of March 1, 2024.

The "Total Arrests" and "Except. Clear" columns indicate the number of incidents in the "Total Incidents" column that were cleared by arrest or by exceptional clearance.

The clearance rate is determined by summing total incidents with arrests and total incidents involving exceptional clearances and dividing by total incidents.

The Crime Count percent change is calculated using the formula: $(2023 \text{ Crime Count} - 2022 \text{ Crime Count}) / 2022 \text{ Crime Count} \times 100$.

Starting in 2021, updated previous year clearance rates are being provided to compare to current year clearance rates. The 2022 clearance rates in this report have been updated to include all data submitted for 2022 incidents through March 1, 2024, to account for criminal incidents that were cleared by arrests or exceptional clearances after the data deadline for last year's report (March 1, 2023). Users should be aware that because criminal incidents that occurred in 2022 have had an additional year to be investigated to the point of arrest or exceptional clearance compared to 2023 incidents, 2022 clearance rates may automatically be higher in some areas. Using updated numbers, the 2022 clearance rate increased 6.8 percentage points. A similar increase is expected for the 2023 clearance rates when the 2024 report is created.

*Official MICR Crime Counts use the following logic: for Crimes Against Persons, Victim Counts are used based on an offense hierarchy where only the most serious offense per victim is counted; for any other crimes, Offense Counts are used except for three file classes. Crime Counts for MICR 22001 and 22002 (Burglary) are determined by the total premises entered during the commission of those offenses. Crime Counts for MICR 24001 (Motor Vehicle Theft) are determined by the sum of total attempted motor vehicle thefts and the total vehicles stolen.
