OK2SAY TECHNICIAN'S CORNER

Looking back on a successful first year, the team expresses deep appreciation to schools, local law enforcement, and all other tip recipients for their concern and professionalism in addressing tips.

The most reported topic continues to be bullying.

A recent example involves a tip from a bystander concerned about another student being bullied on the bus. The victim was being physically and verbally assaulted and the tipster was concerned that the bullying might lead to self-harm or suicide. The school acted quickly, addressing the bullying and providing support to the bullied student. Parents of the victim and the bullies were involved in the intervention.

All tips are taken seriously and we even forward tips with limited information. We understand that receiving limited information may be frustrating, but that information, when combined with what the school already knows, may be significant.
