Is PFAS in your drinking water?

Front

You can't see, smell, or taste PFAS in your drinking water.

Even if your drinking water looks clear, it doesn't mean it's free of PFAS.

Discussion:
MI PFAS MCL Stakeholder
Listening Sessions

Sandy and Rick

Goals for next year – Captured from the August meeting:

1. Public Notification (this had the most discussion and seemed to be the top priority)
2. Getting an audience with Governor Whitmer
3. Getting funding to do our own research or publications
4. Education with others
5. Registry of all PFAS being used in industry and focus on worker safety
6. Increase membership across the state (there are over 290 identified sites)
7. Education for physicians in the state
8. Provide assistance to other communities that feel that their voices are not heard
9. Get updates from MDARD on Food supply

REMINDER

Join the Michigan Department of Environment, Great Lakes, and Energy (EGLE) for the annual *virtual* Great Lakes PFAS Summit
December 3 – 5, 2024.
