MANAGEMENT

This memo and attached information is being provided in response to the MDEQ's May 29, 2018 letter entitled *Wolverine World Wide, Inc. (Wolverine) Per- and Poly-fluoroalkyl Substances (PFAS) Response Kent County, Michigan Municipal Water Connections and Private Wells Evaluation*. The May 29 letter is attached for your convenience.

Please find enclosed the following requested items:

- 1) A table summarizing the following parcel by parcel for the House Street, Rogue River, and Woven/Jewell Study Areas: use of municipal water, use of private wells, private well sample dates, comment on lack of sample collection (as applicable), and status of POU and POET filtration systems.

The request for confirmation of alternate water offers and use is not included in the table. As you know, all parcels have been offered alternate water in the form of door-to-door canvassing with immediate offers of bottled water and gift cards for additional water purchase as well as water delivery service contact information. Wolverine cannot control who accepts or continues to use bottled water and/or the delivery service but has offered it to all parcels which have been sampled or proposed for sampling. The enclosed table also includes a column for those receiving water delivery service as of the end of May 2018.

- 2) A figure including the listed study areas. The figure categorizes each parcel by either municipal water used, vacant land, residential well sampled, or residential well not sampled. The data used to generate this figure was complete through June 26, 2018.

As you know R&W/GZA provided much of this information in an April 2018 memo. It is included in the GIS updates that are provided to AECOM weekly, and is routinely updated in various correspondence and discussion with the agency. R&W/GZA is also tracking this information internally.

Please note that we disagree with certain assertions in the following paragraph of your May 29 letter.

The DEQ wants to emphasize that the documentation of the identification and sampling of all impacted or threatened drinking water wells and provision and maintenance of alternate water and filters is an on-going Wolverine obligation and may not be limited to currently established sampling areas. If the DEQ identifies additional water wells in the future that are impacted or threatened by PFAS contamination attributable to Wolverine, Wolverine will need to provide the DEQ the information requested above to

Wolverine – Municipal Water Connections and Private Wells Evaluation – Follow Up

Page | 2

document the sampling results and provision of alternate water and/or filters, as necessary, to mitigate identified exposure risks.

As you know, under the January 2018 PFOA+PFOS Part 201 criteria, any obligation to provide alternate drinking water (either via bottled water or filtration) is limited to residents with individual well testing results potentially attributable to Wolverine that are above 70 ppt for PFOS+PFOA, not any PFOS+PFOA concentrations or any PFAS detection as the above paragraph suggests.

Nevertheless, Wolverine has been working diligently to address the PFAS issues during the past year. The majority of the work has been voluntary and goes well beyond Wolverine's obligations under Part 201. Notably, there were no cleanup criteria in Michigan for any PFAS compounds until January 2018, and yet Wolverine conducted extensive work in the months prior to that date. Wolverine fully intends to continue its current efforts, but in doing so finds it important to note that its efforts have complied with and gone beyond any legal requirements.

Dear Mr. Latchana,

SUBJECT: Wolverine World Wide, Inc. (Wolverine) Per- and Poly-fluoroalkyl Substances (PFAS) Response
Kent County, Michigan
Municipal Water Connections and Private Wells Evaluation

Staff from the Department of Environmental Quality (DEQ), Remediation and Redevelopment Division, has reviewed the memorandum and associated attachments titled, "Municipal Water Connections and Private Wells Evaluation", prepared by Rose and Westra, dated April 18, 2018. Based on our review, we have the following comments and/or requests that should be addressed:

- Please include a summary table that clearly documents your findings and conclusions for each parcel within the House Street, Rogue River, and Wolven/Jewell Study Areas. The DEQ is requesting that at least the following information be easily identified and provided on the summary table:
 - Does the parcel utilize municipal water?
 - Does the parcel utilize a private drinking water well?
 - Has the drinking water well been sampled? If not, why?
 - Has the parcel been offered alternate water?
 - Has this parcel accepted alternate water? If not, why?
 - Has this parcel had a point of use and/or point of entry filter installed?
- Please provide a figure and/or figures that graphically depict the information summarized on the requested summary table above. For example, the figure should clearly show all parcels present in each sampling area, identify if the parcel has a well or utilizes municipal water, identify if the parcel has been sampled or not, and include any other useful information.
- Please include all attachments to this memorandum in a PDF format, incorporated into one PDF submittal document.

The DEQ wants to emphasize that the documentation of the identification and sampling of all impacted or threatened drinking water wells and provision and maintenance of alternate water and filters is an on-going Wolverine obligation and may not be limited to currently established sampling areas. If the DEQ identifies additional water wells in the future that are impacted or threatened by PFAS contamination attributable to Wolverine, Wolverine will need to provide the DEQ the information requested above to document the sampling results and provision of alternate water and/or filters, as necessary, to mitigate identified exposure risks.

Please provide the requested information to the DEQ within 30 days of receipt of this letter.

If you have any questions or concerns related to this request, please contact me at your earliest convenience at the Grand Rapids District Office at the contact information below.

Sincerely,

Abigail Hendershott
District Supervisor
