

PFAS in Food and Animals

Kevin Besey
Public Health Project Manager

PFAS in Food and Animals

- Pets and other animals should drink the same water you do. If you need filtered water, so do the animals.
- There are no federal standards for safe levels in food. Best practice is to reduce exposure wherever possible.
- Gardens- Tips for minimizing exposure
 - Use rain water or filtered water for irrigation
 - Use raised beds with new, clean soil
 - Peel root crops
