

LEGEND

- APPROXIMATE PROPERTY LINE
- APPROXIMATE RIVER EDGE
- FENCE
- RAILROAD TRACKS
- APPROXIMATE EXTENT OF WASTE MANAGEMENT UNITS (WMUs) AND AREAS OF CONCERN (AOCs)
- GROUNDWATER CONTOUR (MAY 2018)
- PFOS+PFOA ISOCONCENTRATION LINE
- PFAS INVESTIGATION - TEMPORARY WELL LOCATION
- PFOS+PFOA CONCENTRATION (ng/L)
- EXISTING MONITORING WELL LOCATION
- APPROXIMATE ABANDONED MONITORING WELL LOCATION
- GEOPROBE BORING AND EXISTING TEMPORARY MONITORING WELL COMPLETED BY WESTON
- APPROXIMATE GEOPROBE BORING LOCATION COMPLETED BY WESTON
- APPROXIMATE HISTORIC GROUNDWATER SAMPLE LOCATION

NOTES

1. BASE MAP DEVELOPED USING AERIAL IMAGERY FROM GOOGLE EARTH™, APRIL 17, 2017, AND A SITE SURVEY COMPLETED BY MIDWEST CONSULTING IN MARCH 2018. SITE SURVEY INCLUDED EXISTING BUILDING CORNERS, FENCELINE, AXILLARY STRUCTURES AND MONITORING WELLS. THE LOCATIONS OF HISTORIC SITE FEATURES (e.g., EXCAVATION AREAS, SOIL BORINGS COMPLETED BY WESTON, AND ABANDONED MONITORING WELLS) ARE APPROXIMATE.
2. IN 2017 TRC COMPLETED INCREMENTAL SAMPLING IN THE VICINITY OF WMU #2. SEE ASSOCIATED TECHNICAL MEMORANDUM FOR DECISION UNIT BOUNDARIES.
3. DUE TO LOW PRODUCTIVITY THE WELL COULD NOT BE PROPERLY DEVELOPED, AND THE SAMPLE COLLECTED HAD HIGH TURBIDITY. SAMPLE RESULTS ARE BIASED HIGH DUE TO PFAS-AFFECTED SEDIMENT IN THE SAMPLE AND ARE NOT REPRESENTATIVE OF THE AQUIFER CONDITIONS.
