37. Total Underpaid Estimate Penalty and Interest. Add lines 28 and 36. Carry to Form 5297, line 48. (If amending, see instructions.)	37.				00

Instructions for Form 5324, City of Detroit Corporate Income Tax Penalty and Interest Computation for Underpaid Estimated Tax

Purpose

Use this form to compute penalty and interest for underpaying, late, or failure to make payment of quarterly estimates. If a taxpayer prefers not to file this form, the Department of Treasury (Treasury) will compute any applicable penalty and interest and bill the taxpayer.

Avoiding Penalty and Interest

If the tax liability on line 1 is less than \$250 then no estimated payments are required. A taxpayer may remit quarterly estimated payments by check with a *City of Detroit Corporate Income Tax Quarterly Return* (Form 5300).

Line-by-Line Instructions

PART 1: ESTIMATED TAX REQUIRED

Line 4: Enter 70 percent of the annual tax amount from line 3.

Line 5: Enter the due date for each quarterly return. For calendar year filers these dates are April 15, June 15, September 15 and January 15. For fiscal year filers, these dates are the 4th, 6th, 9th and 13th months after the start of the fiscal year.

Line 6: Divide the amount of the estimated tax required for the year on line 4 by four and enter this as estimated tax for each quarter. If the business operated less than 12 months, divide by the number of quarterly returns required and enter this as the estimated tax for each quarter.

Line 7: Complete column A only. Enter the amount of prior year overpayment credited to the current tax year estimates.

Line 8: Amount paid. On this line enter the estimated payments made by the taxpayer.

- **Column A:** Enter estimated payment made by the due date for the first quarterly return.
- **Column B:** Enter payments made after the due date in column A and by the due date in column B.
- **Column C:** Enter payments made after the due date in column B and by the due date in column C.
- **Column D:** Enter payments made after the due date in column C and by the due date in column D.

If quarterly payments are made after the due date, penalty and interest will apply until the payment is received. If less than full payment is made with a late filing, the taxpayer will need to perform multiple penalty and interest calculations for each column. Attach a separate schedule if necessary.

PART 2: FIGURING INTEREST

Compute the interest due for underpayment of the required estimated tax in this section. Follow the instructions for each line, as interest is calculated separately for each quarter and the interest rate might not be the same for each quarter.

Line 17: Enter the due date of the next quarter or the date the tax was paid, whichever is earlier. In column D, enter the earlier of the due date for the annual return or the date the tax was paid. An approved extension does not change the due date of the annual return (column D) for this computation.

Line 26: NOTE: The interest rate is adjusted by Treasury on January 1 and July 1 of each year to 1 percent above the adjusted prime rate, and is posted as a Revenue Administrative Bulletin (RAB). For updated interest rates, go online to michigan.gov/taxes and select "Reports and Legal" in the banner near the top of the page. The applicable RAB is titled "Interest Rate."

PART 3: FIGURING PENALTY

Compute the penalty due for underpayment of the required estimated tax in this section. Follow the instructions for each line, as the penalty and interest is calculated separately for each quarter and the penalty percentage and interest rate might not be the same for each quarter.
