LAW & ANALYSIS

Effective April 1, 2013, the sales tax prepayment collection and reporting obligations under Section 6a of the General Sales Tax Act are expanded pursuant to Public Act 509 of 2012 to include a broader category of fuels. MCL 205.56a(2). This is accomplished by requiring prepayments with respect to “fuel,” which is a defined term added to Section 6a(11) by Public Act 509 of 2012. The term “fuel” includes both “gasoline” (which includes, among other things, alcohol and any oxygenate that can be blended for use in a motor fuel) and “diesel fuel” (which excludes dyed diesel fuel and kerosene) as those terms are defined in Section 6a(11). MCL 205.56a(11). Therefore, beginning April 1, 2013, at the time of purchase or shipment from a refiner, pipeline terminal operator, or marine terminal operator, a purchaser or receiver of “fuel” shall prepay a portion of the sales tax at a rate determined and certified by the Department.

Under Section 6a(4) of the General Sales Tax Act, as amended by Public Act 509 of 2012 and Public Act 1 of 2013, the prepayment rates for both gasoline and diesel fuel will be determined by the Department on a monthly basis and published by the Department no later than the 10th day of the month immediately preceding the month in which the new prepayment rates will be in effect. MCL 205.56a(4). The prepayment rate for gasoline will be based on 6% of the statewide

average retail price of a gallon of self-serve unleaded regular gasoline and the prepayment rate for diesel fuel will be based on 6% of the statewide average retail price of a gallon of undyed No.2 ultra-low sulfur diesel fuel. Each rate will be rounded up to the nearest 1/10 of 1 cent.

The prepayment rates for gasoline and diesel fuel effective for the month of **May 2013** were determined by the Department based on the statewide average retail prices of self-serve unleaded regular gasoline and undyed No.2 ultra-low sulfur diesel fuel for the period commencing March 1, 2013 and ending March 31, 2013.
