MI Rank 40

Highlights

The labor force participation rate is a measure of the labor force as a percent of the 16+ civilian non institutional population. During the latter half of the twentieth century, the labor force participation rate increased dramatically, largely driven by an increasing number of women joining the labor force. Since 2001, the rate has steadily declined, exacerbated by the 2001 and 2008 recessions. The labor force participation rate in Michigan fell slightly between October and November.

MI Rank 44

Highlights

The U-6 is an alternative measure of labor underutilization. The U-6 includes the total unemployed, plus all marginally attached workers (individuals who have given-up looking for work), plus total employed part time for economic reasons, as a percent of the civilian labor force plus all marginally attached workers. By definition, the U-6 is higher than the U-3, the official unemployment rate. In Michigan, the U-6 measured 15.8% for the twelve month period ending third quarter 2013, the lowest rate since before the beginning of the Great Recession. The U-6 for the U.S. is 14.1%

Highlights

Michigan's share of U.S. payroll jobs held roughly steady over the month. After dropping to below 3 percent in 2009 and 2010 Michigan's share of U.S. payrolls has consistently hovered near 3 percent since 2011. Since 1990, Michigan has seen its jobs as a share of U.S. jobs steadily decline, reflecting significant job losses in Michigan.

LV Sales (mill)	16.3
#Δ / month	1.2
%Δ / month	7.7%
#Δ / year	1.0
%Δ / year	6.9%

Highlights

Light vehicle sales increased sharply by 7.7 percent in November to a 16.3 million unit annual average rate. The vehicle sales rate was the highest in seven years. Some sales were shifted into November that were delayed due to the partial government shutdown. Job growth and easier access to credit has helped vehicle sales. From a year ago, light vehicle sales are up 6.9 percent.
