

New Jobs Training Programs 2022 Report

Prepared by
Office of Revenue and Tax Analysis
Michigan Department of Treasury

Scott Darragh prepared this report based on reports submitted by the participating community colleges and withholding diversions reported by participating employers.

This report is required by Section 713 of the Income Tax Act, and will be transmitted to the Governor, the Clerk of the House of Representatives, the Secretary of the Senate, the chairperson of the House Committee on Economic Development and Small Business, the chairperson of the Senate Committee on Economic and Community Development, the chairperson of the House Appropriations Subcommittee on Licensing and Regulatory Affairs, the chairperson of the Senate Appropriations Subcommittee on Labor and Economic Opportunity, the chairperson of the Senate Appropriations Subcommittee on LEO/MEDC, and the chairperson of the Michigan Strategic Fund in accordance with Section 713.

**New Jobs Training Programs
2022 Report
June 2023**

Public Acts 359 and 360 of 2008 amended the Community College Act and the Income Tax Act, respectively, to allow a community college and an employer to enter into an agreement to provide training for new jobs and use the income tax withholding on the new jobs to pay for the costs of the training. Colleges and employers may enter into new agreements until December 31, 2023. A community college district may sell revenue bonds to finance training programs, in anticipation of the withholding payments due under an agreement with an employer. The aggregate outstanding obligation of all agreements entered into under the New Jobs Training Program shall not exceed \$50 million in any calendar year. As contract expenses are incurred and reimbursed, the available balance under the \$50 million cap increases.

Public Act 38 of 2012 requires the Department of Treasury to produce a report each year on the operation and effectiveness of the new jobs training programs. This report focuses on the 232 agreements in effect at some point during 2022. A total of 224 agreements involving 23 community colleges remained in effect at the end of 2022, and those agreements are presented in Table 1 grouped by community college.

The primary business code for each of the agreements is shown by college in Table 2. The agreements are generally numbered by the date of the agreement. The most common industry for an employer with an agreement is motor vehicle and equipment manufacturing, with the original agreement amounts within this industry totaling almost \$38.6 million for 30 agreements. Only two other industries have original agreement amounts totaling more than \$2.0 million. See Table 3 for a distribution by business code of the agreements that were in effect during 2022.

Table 4 shows the amount of the original contract, reflecting the potential issuance of revenue bonds by community colleges for the contracts that reported training activity during 2022. During 2022, \$2,845,245 in training expenses or debt were incurred and these expenses are also listed in Table 4. The 2022 total is lower than the expenses reported for 2021. The contracts with training activity in 2022 had an original contract value of \$48.6 million. Table 5 presents the number of new employees who were involved in the training programs during 2022, with the totals presented for all active agreements at each community college.

Since the program began in 2010, almost \$68.3 million in income tax withholding has been reported to Treasury as applied to training costs, with almost \$9.5 million in net withholding reported during 2022. Table 6 presents the original contract amounts by community college, along with the withholding diverted to the colleges to offset training costs. The withholding amount in Table 6 is based on reports filed by participating employers with Treasury through December 31, 2022, and may differ from the withholding amount reported by the colleges on their annual reports as some payments are in transit at the end of the year. For 2022, community colleges reported \$8.8 million in withholding used to offset training costs. The outstanding balance as of the end of 2022 was \$45.0 million. This means there was a balance of \$5.0 million available for new agreements as of December 31, 2022, and new agreements have been executed in 2023. The outstanding balance reflects withholding diversions to cover training expenses, agreements that were cancelled prior to the commencement of training, amendments to agreements that either raise or lower the contract amount, and agreements that were terminated before all the training proposed originally was completed.
