## BAR/COCKTAIL LOUNGE HEATING, COOLING AND AIR CONDITIONING

Costs listed below are averages. These costs are averages of total installed cost of the entire heating or cooling installation including its prorated share of contractors' overhead and profit and architects' fees. If the heating found in the building being assessed is different from that indicated, take the difference between the costs of the two and add to or subtract from the base square foot cost. For other types or system adjustments, see Segregated costs.

GOOD CLASS C

**OCCUPANCY DESCRIPTION:** This occupancy includes plumbing and electrical connections for restaurants, bars, billiard rooms, restrooms and miscellaneous rooms within the basic structure. Side aisles are typically found in service areas behind the pinsetters and adjacent to each lane along the exterior walls. Areas designated for spectator seating and promenades vary in size depending on design characteristics for the building and the personnel capacities. Bowling alleys typically have some type of combined heating and

cooling system servicing the buildings. Floor finishes usually are a combination of carpet and resilient floor coverings.

**INCLUDED IN COSTS:** Architects' fees and contractors' overhead and profit. Partitions for offices and auxiliary facilities consistent with quality.

**NOT INCLUDED IN COSTS:** Equipment or fixtures associated with the bowling alley; i.e., ball returns, alleys, billiard, kitchen or bar equipment.
