TO: EQUALIZATION DIRECTORS
ASSESSING OFFICERS

FROM: LESLIE V. ANDERSON
APPRAISER, LOCALLY ASSESSED UTILITIES

Please find enclosed a copy of the 1982 cost schedule for REA distribution systems as approved by the State Tax Commission at a meeting on October 12, 1982. This schedule should be used for the 1983 tax year (December 31, 1982 tax day).

You will note that the starting costs have been increased to reflect current construction costs. This is in keeping with the Tax Commission policy of up-dating construction cost schedules such as the residential, commercial and industrial guides. This would put the Cooperative's equipment on the same basis as other types of property that is revalued annually. You will also note that underground distribution line miles are to be included in the miles of single phase line miles. This is a temporary procedure and may change in future schedules.

If you feel the schedule is not appropriate for your cooperative, the option of reporting personal property on the basis of original cost is available if the reporting system is approved by the State Tax Commission.

Please contact me if you have any questions regarding the use of the schedule.

Very truly yours,

Leslie V. Anderson
Appraiser, Locally Assessed Utilities
