STATE OF MICHIGAN INVESTMENT BOARD MEETING

JUNE 10, 2021

Agenda

- 9:30 a.m. **Call to Order and Opening Remarks**
- Approval of the 3/25/21 SMIB Meeting Minutes**
- 9:35 a.m. **Executive Summary & Performance for Periods Ending 3/31/21**
- 9:45 a.m. **Current Asset Allocation Review**
- Markets Review and Outlook**
- 10:00 a.m. **Review of Investment Reports**
- **Private Equity**
 - **Domestic Equity – Receive and File**
 - **International Equity – Receive and File**
 - **Real & Opportunistic Return – Receive and File**
 - **Real Estate & Infrastructure – Receive and File**
 - **Fixed Income – Receive and File**
 - **Absolute Return – Receive and File**
 - **Defined Contribution – Receive and File**
- Basket Clause – Receive and File**
- 10:10 a.m. **Guest Speaker: Sandra Horbach, Managing Director - The Carlyle Group**
- 10:55 a.m. **Public Comment**
- 11:00 a.m. **Closing Remarks ~ Adjournment**

2021 Meeting Schedule

Thursday, September 16, 2021
Thursday, December 9, 2021

All meetings start at 9:30 a.m.

State of Michigan Retirement System

MINUTES

State of Michigan Investment Board Meeting

June 10, 2021

Jon M. Braeutigam
Chief Investment Officer
Bureau of Investments

STATE OF MICHIGAN INVESTMENT BOARD

March 25, 2021 Meeting Minutes

Board Members Present

Chairman – Treasurer Rachael Eubanks – via Microsoft Teams - East Lansing, MI
Ms. Dina Richard – via Microsoft Teams – Northville, MI
Mr. Reginald Sanders – via Microsoft Teams – Portage, MI
Mr. James Nicholson – via Microsoft Teams – Detroit, MI
Mr. David Massaron – via Microsoft Teams – Lansing, MI

Members of the Public and Bureau of Investments Staff Present – via Microsoft Teams

Jon Braeutigam	Lori Barrett	Joanne Bump
Robert Brackenburg	Patrick Moraniec	Anne Clifford-Alicea
Karl Borgquist	Daniel Quigley	Todd Warstler
Greg Parker	Jennifer Yeung	Jack Behar
Jim Elkins	Woodrow Tyler	Semone James
Peter Woodford	Mark Porrell	Anthony Estell
Annette Russell	Karen Stout	Lan Chen
Janet Sudac	Molly Jason	Travis Haney
Jeffrey Guilfoyle	Paul Lerg	Allison Wardlaw
Ann Storberg	Pavel Stolarczyk	Ryan Marr
Nicholas Whitman	Ryan Rathman	Betty Nicklesen
Mary Pollack	Steve Cummings	

Many others were present via Microsoft Teams teleconference.

Opening Remarks:

Rachael Eubanks called the meeting to order at 9:30 am. She mentioned the hard work put forth in the implementation of the new emerging markets program. A welcome to new board member David Massaron.

Approval of Minutes:

Approval of the December 10, 2020 SMIB Meeting Minutes – Motion to approve by Reginald Sanders. Seconded: James Nicholson. The vote was unanimous to approve.

AGENDA

Executive Summary

Mr. Jon Braeutigam, Chief Investment Officer for the Bureau of Investments, reviewed the executive summary performance section discussing performance returns and markets. He explained that over the past 10 years, returns have been strong at 9.8%. The 7, 5, 3 and 1-year returns have been remarkably consistent. In general, he believes it has been a very good decade for pension funds as well as investors and equity markets. During this time, bond rates have come down to rock bottom levels and that has helped all asset classes.

Mr. Braeutigam stated that on a relative basis, the SMRS' 10-year return is 120 basis points (bps) better than the peer return. This added about \$13.2 billion in value. The pension fund is actually at a record high at the end of December at \$84.2 billion, this is the combined systems market value. This record high was reached despite paying out over \$21 billion to pensioners.

Asset Allocation Review, Markets Review and Outlook

Mr. Gregory Parker, Director of Investments – Public Markets discussed that the markets over the past year have been called lots of things: unprecedented, unusual, volatile, wild, crazy, never seen anything like it, once in a lifetime. He believes it is fair to say that even under the best of circumstances it is unwise to predict markets, but last year truly was unpredictable. It wasn't just the markets, it was how we lived, worked, everything day-to-day was not usual in the least, obviously mostly due to the pandemic. But added to the anxiety, we had a highly contested, very close U.S. presidential election.

The Director of Investments assists the Bureau of Investments (BOI) in coming up with a coherent plan for the assets collectively to earn the required rate of return, to help think through the risks and trade-offs, and to understand how the SMRS Plan portfolio may differ from other public pension plans. This is called "Strategic Asset Allocation" and when coming up with the plan we do try to consider outlier markets. While we don't have a pandemic model per se, we do consider markets that act and behave in an unprecedented, unusual, volatile, kind of way.

The Strategic Asset Allocation consists of two main parts; the strategic weights for the major asset classes we use at the BOI and the policy return (benchmark) for each of the major asset classes we hold at the BOI. He went on to explain further.

As the Director of Public Markets, the Divisions which invest in the traditional asset classes such as cash, bonds, domestic equity and international equity report to him. Mr. Parker stated that we would hear discussion of at least two key reasons why the future long-term expected returns are lower than average and what we are trying to do to add incremental value. In short, starting interest rates and valuations are below the long-term averages, and in the case of fixed income, well below normal.

Domestic Equity Review

Mr. Jack Behar, Senior Investment Manager of the Domestic Equity Division reviewed performance, stating that in the quarter ended December 31, 2020, Total Domestic Equity outperformed its peer group over three, five, seven and ten years while outperforming or matching the S&P 1500 over three, five and seven years. During the past year, performance was 90 bps behind the benchmark, net of fees, with incurred tracking error of 3.5%.

The division's strategy update indicated that the division is well positioned for an economic recovery, further fiscal stimulus, low interest rates and the Fed's accommodative stance, with a relative overweight to both smaller cap value stocks as well as to in-favor momentum stocks.

The division is very gradually rebalancing its portfolio away from less profitable stocks that have experienced significant price appreciation over the past year (and likely still have a very bright future) into solidly profitable companies that can weather any environment.

The division is also keeping an eye on interest rates and the potential for more significant inflation than has been experienced over the past decade, potentially driven by the end of the pandemic, pent up demand and more money in the system. If interest rates were to rise in a significant way,

it could lead to a value stock outperformance cycle while putting a cap on or potentially lowering the market price/earnings ratio.

International Equity Review

Mr. Patrick Moraniec, Senior Investment Manager of the International Equity Division reviewed performance reporting which showed the division outperformed the benchmark in 2020 by 240 bps. The division outperformed peers as well as the benchmark over all listed periods. Although 2020 was not their largest 12-month outperformance, it was possibly the most satisfying given the current environment.

Mr. Moraniec explained that in February 2020 the fastest decline of 30% ever occurred. It took only 22 trading days to fall 30% from its record high. Oil futures prices went to 37 cents a barrel. Then we had the largest 50-day rally in the history of the markets, according to LPL Financial. It was the shortest bear market in history.

He stated that the outperformance in this volatile and chaotic environment was good, but the most satisfying part of 2020 was watching the division's core strategies hold up in a truly difficult two-sided market environment. He touched on the difficulty in adding value above the benchmark in such a volatile and chaotic environment, discussed continuous improvement strategies within the division as well as portfolio positioning.

Fixed Income Review

Mr. Daniel Quigley, Senior Investment Manager of the Fixed Income Division reviewed performance, explaining that performance was terrific in the bond markets.

Performance in the bond markets was terrific at 7.5%, however, relative performance lagged. The biggest reason for this is that we operate what is effectively a core-plus strategy. Our strategy tilted very much towards securitized assets which was at the epicenter of the sell-off in the first quarter. Since then they have had an excellent recovery. Last year we had meaningful decreases in interest rates which really benefited the benchmark and then a very severe sell-off in credit spreads in the first quarter followed by a very dramatic recovery.

He discussed positioning, explaining high-yield and high-yield characteristics and touched on markets and the positioning of the portfolio.

Review of remaining Investment Reports and Basket Clause – Received and Filed

Closing Remarks

Chairman Eubanks thanked the speakers for their well-prepared presentations.

Public Comment:

No public comment.

Adjournment:

The meeting concluded at 11:09 am.

Approved:

Rachael Eubanks, Chairman

EXECUTIVE SUMMARY

State of Michigan Investment Board Meeting

June 10, 2021

Gregory J. Parker, CFA

Director of Investments – Public Markets

Director of Asset Allocation

Bureau of Investments

EXECUTIVE SUMMARY

March 31, 2021

Performance

Great peer comparison.

MPSERS Plan (3/31/21)	1-Year	3-Years	5-Years	7-Years	10-Years
Annualized Returns	27.5%	10.7%	11.4%	9.6%	9.8%
Policy Returns	26.2%	10.8%	11.3%	9.6%	9.9%
Peer Median Returns*	29.0%	9.7%	10.3%	8.3%	8.7%

*State Street Universe greater than \$10 billion.

- Over the past three, five, seven, and ten years, the returns are significantly higher than peer median returns. The peers are defined as the State Street Universe of public pension plans greater than \$10 billion. Notably, the standard deviation of the monthly returns was in the lowest quartile for the longer time horizons.
- Over a very long horizon, since 1979, the annualized rate of return on the plan assets has been approximately 9.5%.
- Compounding at higher than peer returns can add significant value. For example, based on the \$51.4 billion March 2011 market value, a ten-year annualized return of 9.8% compared to the 8.7% peer median return would add about \$12.5 billion in excess value.
- Most asset classes earned returns comparable to or better than peer median returns over the longer-term in addition to meeting or exceeding the asset class specific benchmarks.

Asset Allocation

A low return environment.

- Given the low rates of return available in the capital markets for safe assets, and in order to earn the actuarial rate of return, additional risks (primarily equity risk) must be assumed. At the end of March 2021, the equity risk (beta) is approximately 0.38 which is the lowest measurement in three decades, and it is lower than peer median at approximately 0.6.
- Liquidity is another fundamental risk assumed and it is managed through asset allocation. The plans have outstanding capital commitments to fund approximately \$13.5 billion in illiquid assets, primarily in private equity. In the March 2021 quarter, \$1.7 billion of new commitments were made.
- The combined systems paid out approximately \$2.0 billion net of contributions over the past twelve months ending in March 2021. Over the past year, the allocation to long-term fixed income was reduced by \$773 million, absolute return by \$712 million, domestic equity by \$522 million, private equity by \$251 million, real return & opportunistic by \$132 million and real estate by \$109 million. The allocation to short-term cash increased by approximately \$545 million.

Investment Update

Highlighting the quarter.

(\$ Millions)

PERFORMANCE

State of Michigan Investment Board Meeting

June 10, 2021

Jon M. Braeutigam
Chief Investment Officer
Bureau of Investments

Bureau of Investments

Mission Statement

The Bureau of Investments continually strives to provide quality investment management services, broad professional expertise, and independent advice to the State of Michigan Investment Board as fiduciary of the State of Michigan Retirement System, and independent of the Board, to the State Treasurer for various Michigan trust funds and the State's common cash, for which the State Treasurer is the fiduciary.

SMRS Goals

Maintain sufficient liquidity to pay benefits.

*Meet or exceed the actuarial assumption
over the long term.*

*Perform in the top half of the public plan
universe over the long term.*

Diversify assets to reduce risk.

*Exceed individual asset class benchmarks
over the long term.*

Overview

A market update.

- Capital market assumptions used for determining strategic asset allocations are being reduced across the board, and especially for safer, publicly traded fixed income securities. This is the general opinion for most consultants, investment banks, and other market participants. The reason for this phenomenon is the low interest rate environment caused by the policies of the Federal Reserve (Fed) and other central banks, as well as the run-up in prices for most risk assets over the past several years.
- Longer term interest rates have been rising over the past year, however short-term rates (3-year maturity and in) continued to fall. Because of this, the U.S. Treasury rate curve is the steepest it has been since June 2015. This was six months prior to the Fed first tightening rates coming out of the Global Financial Crisis.
- The commodities prices broadly, as measured by the CRB index, are up sharply at 37% over the 12-month period ending March 2021. These are the highest levels in roughly a decade. Many economists maintain the viewpoint that these prices reflect some short-term supply and demand imbalances. Alternative viewpoints suggest that the Federal Reserve's monetary policies, and the U.S. government's fiscal policies have created structural imbalances and will cause longer-term inflation to be higher than normal.
- Dividend yields on REITs at the end of March 2021 were estimated to be around 3.0%, which is nearly 1.3% higher than the yield of the 10-year U.S. Treasury. This is at the historical metric and may be seen as fairly attractive.
- Based on an expected annualized equity market return of approximately 7.3%, should historical hedge fund betas and alphas continue, a 5.2% annualized net return seems like a reasonable assumed rate of return for hedge funds.

U.S. Fixed Income

Tough valuations in Fixed Income.

- Longer term interest rates have been rising over the past year, however short-term rates (3-year maturity and in) continued to fall. Because of this, the U.S. Treasury rate curve is the steepest it has been since June 2015. This was six months prior to the Fed first tightening rates coming out of the Global Financial Crisis.
- Interest rates at both the long and short end are earning less than the year-over-year increase in CPI.
- Both investment grade and high yield spreads have tightened considerably. Today spreads are at their tightest levels since the early months of 2007.
- It would seem that rates have some upward pressure due to a healing economy and inflation rates higher than nominal rates. This potentially places some stronger headwinds on bond returns. However, as long as the Federal Reserve's policy rate remains at these levels, the shape of the yield curve could put a lid of sorts on the longer dated rates.

Domestic Equity

Another good quarter for risk assets.

- The broad U.S. stock market return for the one year ending March 2021 was 58.4%. This is the third highest 12-month return in the past 50 years.
- Many domestic equity valuation metrics are above historical averages, and analysts expect that fundamentals will continue to deteriorate over the next twelve months. Consequently, the returns over the next cycle may not be as strong as the historical average of 11 – 12% year-over-year total returns. Fundamentally, however, the market's returns on equity continue to be historically higher than average and some of the largest companies in the market today are less cyclical (economically sensitive) than past market leaders. These facts lend support to the argument that higher valuations are justified, and therefore the market could perhaps continue to deliver historical average rates of return in the future.
- The quarter ending March 2021 was another great quarter for risk assets. The small cap Russell 2000 outperformed the larger cap S&P 500 by 6.5%, lifting the outperformance for the year to 38.5%. The value style also had a good quarter relative to the growth style, outperforming by 10.7%. However, over the past year, value still badly trailed growth by -5.9%.

International Equity

A good quarter for risk assets here too.

- International equities underperformed domestic equities for the year ending March 2021 by -9.3%. Over the past three, five, seven, and ten years, the international market index, MSCI ACWI ex USA, underperformed the S&P 1500 index by -10.0%, -6.4%, -8.1%, and -8.8% annualized, respectively.

- Within international equities, emerging market returns exceeded developed markets over the past one, three, five and seven years by 12.5%, 0.1%, 3.2% and 1.8% annualized, respectively. However, over the past ten years, emerging markets returns were -1.6% annualized less than developed markets.
- Based on a price-to-earnings valuation multiple, excluding non-earning companies, developed international markets trade at approximately a 23% discount to U.S. counterparts while emerging markets are at a 30% discount.

Real Estate

Comparing public vs. private real estate.

- Over the one year ending March 2021, the NAREIT index increased by 34.3% including dividends which was 31.7% higher than their private market counterparts. Over the medium to longer-term, publicly traded REITs have earned 0.5% - 1.5% higher return than their private market counterparts but they are about three times more volatile.
- Dividend yields on REITs at the end of March 2021 were estimated to be around 3.0%, which is nearly 1.3% higher than the yield of the 10-year U.S. Treasury. This is at the historical metric and may be seen as fairly attractive.

Hedge Funds

Estimating the asset class return.

- Over the past five years, the Absolute Return portfolio's return has had a monthly beta of approximately 0.2 and annualized alpha of 2.1%.
- Based on an expected annualized equity market return of approximately 7.3%, should historical hedge fund betas and alphas continue, a 5.2% annualized net return seems like a reasonable assumed rate of return for hedge funds. This return is approximately 3-month U.S. Libor plus 320 basis points. However, it should also be noted that in the past after times of market dislocations, the realized alpha has been higher.

Commodities

Inflation; transitory or something else?

- As the economic recovery has gained momentum, and Fed policy remains ultra-accommodative, the attention has turned towards inflation. The U.S. dollar has fallen in value over the past year ending March 2021 by -5.9% as measured by the DXY index and it is at the low end of the past 5 year's trading range.
- The commodities prices broadly, as measured by the CRB index, are up sharply at 37% over the 12-month period ending March 2021. These are the highest levels in roughly a decade. Many economists maintain the viewpoint that these prices reflect some short-term supply and demand imbalances. Alternative viewpoints suggest that the Federal Reserve's monetary policies, and the U.S. government's fiscal policies have created structural imbalances and will cause longer-term inflation to be higher than normal.

State of Michigan Retirement System

PRIVATE EQUITY REVIEW

State of Michigan Investment Board Meeting

June 10, 2021

Peter A. Woodford
Senior Investment Manager
Private Equity Division

EXECUTIVE SUMMARY

Performance

MPSERS Plan (3/31/21)	1-Year	3-Years	5-Years	7-Years	10-Years
Annualized Returns	22.6%	16.0%	15.4%	14.2%	14.6%
PE Benchmark Returns	21.9%	17.6%	18.6%	16.3%	17.3%
Peer Median Returns	14.9%	8.3%	9.8%	9.3%	10.5%
Percentile Rank vs. Peers*	20	5	11	7	9

*State Street Universe greater than \$1 billion

- Private equity returns have been strong relative to peer median returns, ranking in the top 9% of peers over the past ten years. Outperformance to peers is attributable to strategy as well as fund and co-investment selectivity.
- It is not unusual for private equity returns to lag the public benchmark returns during periods of expansion and lead the public benchmark during periods of contraction. Over this period, the Private Equity Division has outperformed the S&P by 70 basis points (ten-year S&P 500 return 13.9%) but underperformed the benchmark by 2.7%.
- For the twelve months ending March 31, 2021, the Private Equity Division returned approximately \$251 million to the plan, net of contributions. Although COVID-19 slowed distributions for much of 2020, the first three months of 2021 have been positive. This trend will likely continue due to current market conditions.
- Commitments closed during the quarter include:
 - \$200 million to HarbourVest Partners Co-Investment Fund VI, L.P.
 - \$150 million to Berkshire X, L.P. a middle market buyout fund
 - \$150 million to Michigan Small and Emerging Manager Fund-Barings, L.P.
 - \$150 million to Michigan Small and Emerging Manager Fund-GCM Grosvenor, L.P.
 - \$100 million to Charlesbank Equity Fund X, L.P., a middle market buyout fund
 - \$50 million to Charlesbank Equity Overage Fund X, L.P. a middle market buyout fund
 - \$50 million to Insight Partners Fund X Follow-On Fund, L.P., a growth equity fund
 - \$50 million to Khosla Ventures VII, L.P. an early stage venture technology fund
 - \$25 million 5AM Opportunities II, L.P., a late state venture healthcare fund
 - \$25 million to 5AM Ventures VII, L.P., an early stage venture healthcare fund
 - \$25 million to Khosla Ventures Opportunity I, L.P., a growth stage venture fund
 - \$5 million to Khosla Ventures Seed E, L.P., a seed stage venture fund

Strategy Update

The strategy for the next twelve months will focus on new sponsors raising capital and existing sponsors raising successor funds. This may be a combination of buyout, venture capital, secondary, and growth equity funds seeking new commitments. Co-investments continue to play an important role in both averaging down costs and targeting specific investments with attractive risk/return characteristics.

State of Michigan Retirement System

DOMESTIC EQUITY REVIEW

State of Michigan Investment Board Meeting
June 10, 2021

Jack A. Behar, CFA
Senior Investment Manager
Domestic Equity Division

EXECUTIVE SUMMARY

Performance

MPSERS Plan (3/31/21)	1-Year	3-Years	5-Years	7-Years	10-Years
Annualized Returns	63.3%	16.5%	16.5%	13.3%	13.7%
S&P 1500	58.7%	16.5%	16.2%	13.4%	13.7%
Peer Median Return	58.3%	13.2%	13.9%	10.6%	11.4%
Percentile Rank vs. Peers *	19	12	23	18	16

*State Street Universe greater than \$1 billion

- In the quarter ended March 31, 2021, Total Domestic Equity outperformed its peer group and exceeded the S&P 1500 Index over one, five, and ten-year time periods. During the past year, performance was over 450 basis points (bps) ahead of the benchmark with incurred tracking error of 2.1%.
- A number of managers in SMRS' portfolio, both internal and external, and across both value and growth styles, contributed to strong performance on the year.
- On the internal management side, SMRS' internal value-oriented strategies rebounded and extended gains, while SMRS Disruptive Innovation Momentum returned over 65% in just six months.
- On the external manager side, Ark Investments returned in excess of 163% while a trio of Michigan-based value managers – Ancora Asset Management, Clarkston Capital and Seizert Capital - all posted stellar, market-beating returns.
- The first quarter of 2021 was marked by the continued resurgence of value stocks, coupled with a significant correction in highflying, young, and disruptive companies. SMRS' portfolio managed to slightly outperform in the quarter despite considerable exposure to such companies, due to strong performance from its value manager lineup.

Asset Class Goal

To provide the SMRS with long-term domestic equity market returns or better, by investing in a diversified and attractively valued portfolio of companies at an index fund-like cost.

Strategy Update

- The domestic equity division continues to be positioned for an economic recovery, with a relative overweight to value and momentum stocks and a portfolio beta of 1.12.
- There are number of crosscurrents we are paying close attention to that could impact our cyclical portfolio positioning as we make our way through the year. In particular, higher interest rates driven by inflationary pressure, coupled with continued appreciation of equity markets, could make stocks less appealing over time.

- On the margin we have been slowly reducing our small cap overweight in exchange for value oriented, quality and often more defensive stocks. For example, several companies in the health care sector exhibit all three of these qualities, and we have added exposure there.
- DED sector overweights include financials, health care, communication services and utilities. Underweights include consumer discretionary and industrials.
- The division's portfolio trades at a roughly 15% discount to the S&P 1500, despite higher levels of profitability and faster rates of reinvestment.

Market Environment and Outlook

- At ~23X forward earnings, equity markets trade at a premium to both their long-term historical average of 15.7X and their twenty-five-year average of 21X.
- Meanwhile 10-year treasury bonds trade at a yield of 1.6%, or ~60X earnings, versus their long-term historical average of 5%, or ~20X earnings.
- Factoring this in, alongside the enormous influx of money injected into the financial system by the Federal Reserve, the sharp rebounding of the economy, continued economic stimulus, and the continued availability of many attractively valued companies, stocks remain a reasonable alternative to bonds and bond-like asset classes.
- Long-term we expect the market to return roughly 7.75%, driven by a dividend yield of 1.4% and earnings per share growth of 6.35%.
- EPS growth is expected to be driven by 4.5% economic growth + 1.85% growth in the form of share buybacks. Such growth is roughly in line with the S&P 500 thirty-year historical dividend growth rate.

Description: The Domestic Equities Composite seeks to deliver excess returns through a blend of index investing and active management with value-added, but diverse strategies. While the goal is for most managers to outperform in the long run, the composite is designed such that they do so during differing parts of the business cycle.

State of Michigan Retirement System

INTERNATIONAL EQUITY REVIEW

State of Michigan Investment Board Meeting

June 10, 2021

Patrick M. Moraniec, CFA
Senior Investment Manager
International Equity Division

EXECUTIVE SUMMARY

Performance

MPSERS Plan (3/31/21)	1-Year	3-Years	5-Years	7-Years	10-Years
Annualized Returns	53.2%	7.7%	10.9%	6.8%	6.4%
MSCI ACWI ex USA Returns	49.4%	6.5%	9.8%	5.3%	5.1%
Peer Median Returns	53.2%	7.1%	10.1%	6.0%	6.1%
Percentile Rank vs. Peers*	52	39	31	29	33

*Source: State Street Universe greater than \$1 billion

- The International Equity Division (IED) outperformed both peers and the division's benchmark over all listed periods.
- The portfolio outperformed the benchmark by 3.8% over the last twelve months.
- Outperformance was driven by the value factor, momentum factor, energy sector, and information technology sector.

Asset Class Goals

- Construct a non-U.S. equity-focused portfolio to generate, on a consistent basis, ten-year returns that exceed the MSCI ACWI ex USA by 1.0%.
- Perform in the top half of the public plan peer universe percentile rankings.
- Advance people, processes, and systems to continuously improve investment decisions.

Strategy

- The division allocates capital with the intention of persistent exposure to the quality factor, momentum factor, and value factor.
- Persistent factor exposures should create consistent, transparent, and efficient returns.
- Current portfolio drivers of risk and return.
 - Tracking error of the portfolio is approximately 1.8%, which is below the division's risk budget of 3.0%.
 - The division's core strategy of exposure to the quality, value and momentum factors (QVM), accounts for only 34.0% of the total tracking error indicating that long-term, the portfolio is not materially exposed to any one single risk.
- Quarterly changes to International Equity Division allocation.
 - Rebalanced \$0.8 billion of equity swaps to match the division's long-term equity factor strategy.
 - Allocated \$0.2 billion of Internal Stock Plus' Tier 3 collateral to LGT Crown European Private Debt III (CEPD III). The investment improves the estimated returns of the collateral portfolio without taking on additional undo market risk.

Market Environment and Outlook

Market Performance

- International stock markets declined nearly -33.0% in early 2020. Since early April 2020, markets have dramatically rebounded up nearly 53.0% through early May 2021. Fundamentals remained sluggish with earnings per share declining -6.3%, leading to significant multiple expansion of approximately 63.0% during the period.
- Performance of the quality, value, and momentum factors remains strategically important to the IED. The value factor outperformed the MSCI ACWI ex USA by 7.9% year-to-date. The quality and momentum factors both have underperformed the benchmark, down -1.5% and -5.6% respectively. IED's core strategy remains balanced and has collectively outperformed the division's benchmark 1.4% year-to-date.
- Emerging markets underperformed the MSCI ACWI ex USA by -3.6% year-to-date. Developed markets outperformed the broader index by 1.6%.
- The U.S. dollar was essentially flat year-to-date up 0.3%.
- Commodities have surged in 2021 up 20.4% year-to-date outperforming international stocks by 11.9%. Oil and copper are both up 33.8% and 34.9% for the year indicating a full recovery is underway as markets attempt to price in a reopening of the economy. Gold has declined -3.4% this year.
- Global government interest rates (index weighted) remain subdued, at approximately 1.1%.

Outlook

- Global stock markets and commodity markets have looked beyond trailing economic fundamentals in anticipation of a fully reopened economy and potentially the emergence of global inflation. Record levels of central bank liquidity have driven stock markets to new market highs despite an above average global recession which is different than prior economic cycles.
- More recently, several signs indicate the global economy is accelerating. The key question remains, can the global economy deliver on the stock market's lofty 2021 growth expectations.
- Europe top line sales and earnings contracted year-over-year at -1.3% and -3.2%. This marks a downward acceleration in trailing fundamentals for Europe. Forward looking sales and earnings per share have continued to improve and are expected to be up over the next 12 months, 7.7% and 28.0% respectively.
- Japan has been slower in its recovery relative to other nations. Sales and earnings per share declined year-over-year -7.5% and -10.3% respectively. Forward looking sales and earnings growth are forecasted at 3.0% and 23.0%.
- Central banks are fully committed to an "anything it takes" policy. The question will be if the vast amounts of liquidity can offset the gap between high market valuations and actual fundamentals especially if growth expectations don't transpire.

- Analysts' expectations are high with forward-looking earnings per share growth estimated at 27.8% for the MSCI ACWI ex USA index.
- Go-forward returns for the MSCI ACWI ex USA index on an annualized basis are estimated at 7.6%. This rate is based on the current price and actual fundamentals over multiple periods to remove fundamental variability, better estimating the earnings power of the index.
- A ten-year blended international government yield of 1.1% implies an international equity risk premium of 6.5%. The equity risk premium decreased during the quarter due to significant increases in stock prices and only minor increases to the long-term earnings projections of the index.

Conclusion

International stock market fundamentals have stabilized. Global government bond yields remain near all-time lows as central banks remain committed to ultra-accommodative monetary policies not seen since the Great Financial Crisis. The policies in Japan, Europe, and now the U.S. are open-ended inflation targeting processes. Central banks' policies will remain low indefinitely as the global recession will last longer than the COVID-19 pandemic.

Forward looking estimates for stock markets are lofty. International stocks are expected to grow earnings per share by 27.8% in the next twelve months. The markets seem to already have priced in this expected growth with 47.0% multiple expansion over the last year. If stock market fundamentals do not match high expectations, IED believes that market multiples may come under significant pressure in 2021.

International stock markets trade at approximately their twenty-three-year average of 17.0x price to earnings history, and a wide spread relative to global risk-free rates. To capture the spread to bonds, international stock investors will need a long investment horizon as the short-term environment may experience increased volatility.

State of Michigan Retirement System

REAL RETURN & OPPORTUNISTIC REVIEW

State of Michigan Investment Board Meeting
June 10, 2021

Jennifer Yeung
Senior Investment Manager
Real Return & Opportunistic Division

EXECUTIVE SUMMARY

Performance

MPSERS Plan (03/31/21)	1-Year	3-Years	5-Years	7-Years	10-Years
Real & Opportunistic	21.8%	13.5%	13.7%	11.7%	11.1%
Custom Benchmark	6.9%	6.7%	7.1%	7.0%	7.2%

- The portfolio value is \$11.2 billion with a one-year return of 21.8%. As global markets continued to rebound in the first quarter of 2021, the valuation of our portfolio holdings increased as well.
- Performance for the year was driven by i) income earned from entertainment royalties, investments in asset managers, credit investments and natural resource strategies and ii) capital appreciation of our natural resources and media and entertainment assets.

Strategy Update

- The objective of the Real Return & Opportunistic portfolio is to provide an inflation hedge and/or to gain exposure to attractive opportunities that may not fit in another plan portfolio.
- During the quarter, the Real Return & Opportunistic portfolio continued to benefit from exposure to assets with low equity beta and diversity of strategy, industry and geography.
- The Real Return & Opportunistic portfolio has approximately \$3.8 billion of unfunded commitments. The following are new commitments closed during the quarter.
 - \$250.0 million to Axton Holdings LLC., follow-on equity contribution to acquire publishing and copyrights and purchase shares currently owned by Management. Music assets generate strong cash flows and are largely uncorrelated to traditional asset classes.
 - \$150.0 million to Blackstone Capital Opportunities Fund IV L.P. and \$37.5 million to Blackstone COF IV Co-Investment Fund L.P., comingled funds focused on upper-middle market, performing companies, with ability to invest flexibly across the capital structure. The Fund is expected to generate a high single digit cash yield and low mid-teens total return.
 - \$75.0 million to Turning Rock Fund II L.P., comingled fund focused on North American, lower-middle market businesses, providing transitional capital for special situations and structured securities. The Fund is expected to generate 3-4% cash yield and low-teens total return.
- In addition to monitoring the impact of COVID-19 and pace of economic recovery, we remain focused on finding differentiated strategies that are additive to the current portfolio mix and continue to favor private credit opportunities and niche strategies with some scalability. Specifically, we like opportunities that have defensible, contractual cash flows and offer structural downside protection. We continue to be selective and favor experienced investment teams with a proven track record.

REAL ESTATE AND INFRASTRUCTURE REVIEW

State of Michigan Investment Board Meeting
June 10, 2021

Todd A. Warstler
Senior Investment Manager
Real Estate and Infrastructure Division

EXECUTIVE SUMMARY

Performance

MPSERS Plan (3/31/21)	1-Year	3-Years	5-Years	7-Years	10-Years
Annualized Returns	-4.5%	3.3%	5.9%	8.1%	9.0%
NCREIF NPI	1.3%	3.6%	4.5%	6.2%	7.4%
Peer Median Returns	2.7%	5.0%	6.1%	8.3%	9.0%
Percentile Rank vs. Peers*	89	72	66	62	47

*State Street Universe greater than \$1 billion

- Underperformance relative to the one-year benchmark resulted primarily from the Real Estate and Infrastructure Division's (REID) strategy of being overweight in hospitality, performance in certain sectors of the infrastructure portfolio and an underweight in the industrial sector. Over the ten-year timeframe the REID is outperforming the benchmark by 160 basis points.

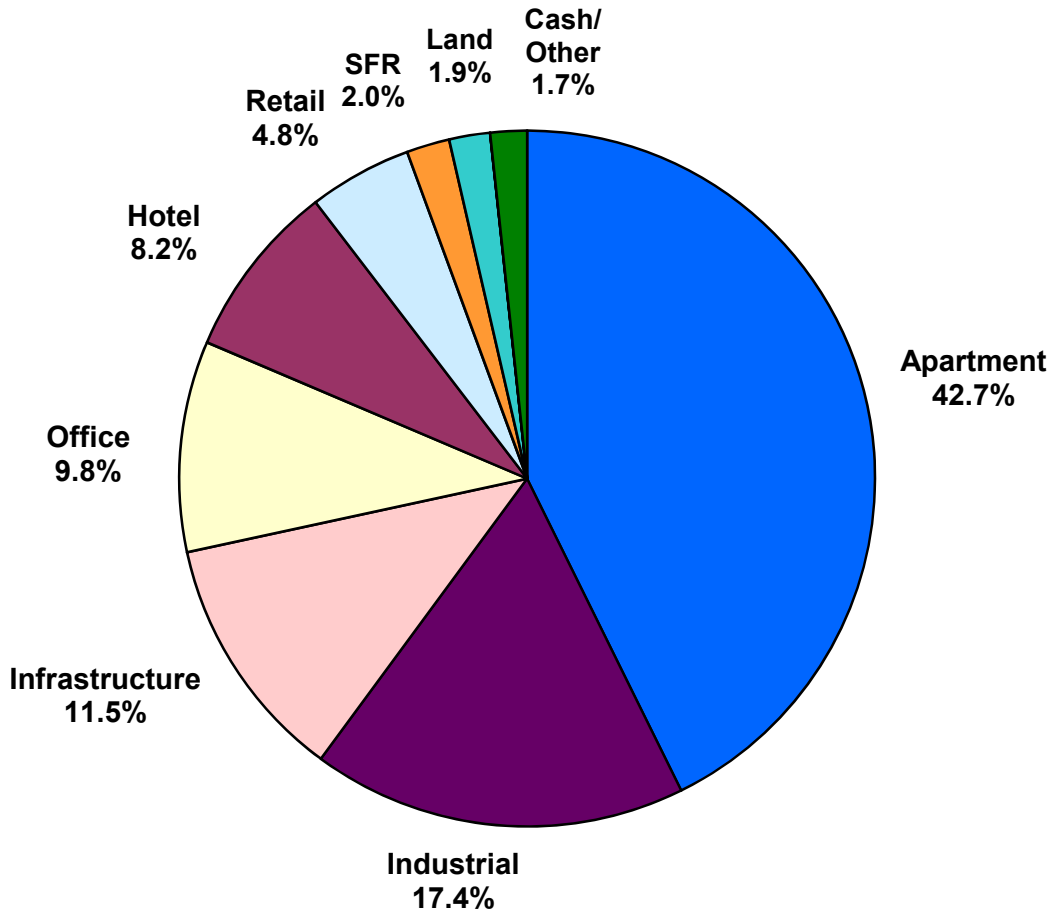

Strategy Update

- The COVID-19 global pandemic and Shelter-in-Place orders implemented to slow the spread of the virus resulted in major negative impacts to the US economy and certain segments of the commercial real estate and infrastructure markets. Large segments of the US economy remain shuttered to various degrees with economic reopening at various stages across the country. The impacts being felt in the commercial markets have been uneven across the real estate and infrastructure sectors. We continue to monitor, assess, and shift strategies, as necessary. US and foreign investors remain cautious, transaction volumes dropped to very low levels at the beginning of the pandemic and remain low for some sectors while rebounding nicely for others.
- We are focused on sourcing off-market opportunities through our extensive network and where available reducing risk in the portfolio through early income-generating investments including credit strategies that are higher in the capital stack with a shorter projected hold period. We have selectively acquired properties where we can add value through management and leasing and have continued to develop properties at attractive risk-adjusted returns. The team continues to assemble portfolios in both traditional and non-traditional real estate sectors that we believe will become institutional property types, providing above market appreciation and total returns.
- We have been actively managing the portfolio with capital returned of approximately \$433 million, and funding for new or existing investments of just over \$575 million over the past 12 months.
- The REID has approximately \$1.6 billion in unfunded commitments. Two new commitments were made during the quarter.
 - \$75 million in BentallGreenOak US Cold Storage, LP, a closed-end vehicle investing in the US Cold Storage industrial sector, managed by BentallGreenOak.
 - \$35 million in ISO III SMRS Sidecar, L.P., co-investment into a European industrial platform alongside Invesco Strategic Opportunities III, L.P. fund investment, managed by Invesco Advisers, Inc.

State of Michigan Retirement System

FIXED INCOME REVIEW

State of Michigan Investment Board Meeting

June 10, 2021

Daniel J. Quigley
Senior Investment Manager
Fixed Income Division

EXECUTIVE SUMMARY

Performance

MPSERS Plan (3/31/21)	1-Year	3-Years	5-Years	7-Years	10-Years
Annualized Returns	6.3%	5.0%	4.5%	4.4%	4.4%
Bloomberg Barclays US Agg	0.7%	4.7%	3.1%	3.3%	3.4%
Peer Median Returns	3.3%	5.0%	3.9%	3.6%	4.0%
Percentile Rank vs. Peers*	28	47	30	21	37

*State Street Universe greater than \$1 billion

- The fixed income portfolio outperformed its benchmark and peer group on a one-year basis. This outperformance was driven by a recovery in risk assets over the previous twelve months, particularly for structured credit securities. The portfolio also maintains a shorter duration than the benchmark which has helped recent performance as interest rates have increased over the previous quarters.
- The performance of fixed income indices was driven by the increase in intermediate and long-term interest rates during the quarter. Long duration indices, such as the U.S. Investment Grade Corporate index, had negative returns for the quarter, offsetting strong gains last year. Shorter duration indices such as U.S. Agency RMBS and High Yield outperformed.
- The year-over-year (YOY) tightening of spreads for high yield credit and structured credit securities was the main driver of performance on a one-year basis. Credit spreads were near their highest levels at the end of March 2020 and have recovered materially over the previous year.

Strategy Update

- The objective of the Fixed Income Division portfolio is to meet or exceed the returns of the Bloomberg U.S. Aggregate Bond Index while satisfying the overall characteristics of a core fixed income portfolio. These characteristics are: income, liquidity, principal preservation, and diversification from equity market risk. The portfolio has a higher yield than the benchmark while having a risk profile that is similar to the long-term volatility experienced in traditional core fixed income. The yield-to-maturity of the portfolio is currently 3.1% versus a benchmark yield of 1.2%. In addition to this, the portfolio exhibits risk characteristics that are in line with the historical volatility of traditional fixed income benchmarks and has an equity beta of 0.1.
- The Core-plus strategy implemented to achieve this goal includes:
 - **Core:** As of March 31, 2021, the portfolio's allocation to U.S. Treasuries, Investment Grade corporate bonds, government-guaranteed U.S. Agency Debentures, RMBS, and Commercial Mortgage Backed Securities (CMBS) was 58.6%. This includes a 26.5% allocation to U.S. Treasuries, TIPS, and cash.
 - **Plus:** The portfolio maintains a strategic out-of-benchmark allocation to high-yield corporate debt, securitized credit, and global fixed income strategies as market opportunities allow. This allocation increases the portfolio yield and total return potential but results in lower liquidity and higher volatility. The allocation to the Plus portfolio was 41.4% as of March 31, 2021.

Tactical Update

- The allocation to securitized credit, primarily in CMBS, ABS, non-agency RMBS, and CLO securities, was 29.3% of the portfolio at the end of the quarter. The combination of low interest rate duration and high coupon income (often floating rate) offers attractive characteristics for the overall fixed income portfolio in this low interest rate environment. This portion of the portfolio experienced large mark-to-market losses in the 1st quarter of 2020 but has recovered meaningfully in the twelve months since. The one-year return on this portfolio was 8.3%.
- The allocation to high-yield strategies was 5.4% at the end of the quarter. This out-of-benchmark position has outperformed for the quarter and on a one-year basis. This has been driven by credit spread compression as well as having a shorter interest rate duration than the benchmark in a rising interest rate environment. The one-year performance of this allocation was 21.9%, outperforming the core index by over 2,000 basis points (bps).
- The portfolio has a meaningful allocation to floating rate securities, including AAA CLO investments and investment-grade floating rate corporate bonds. This allocation accounts for approximately 20% of portfolio assets. This allocation will underperform during risk-off markets when interest rates decline, however, it should exhibit strong risk-adjusted return characteristics on a go forward basis in this low interest rate environment.
- We exited our allocation to U.S. TIPS during the quarter. This exit occurred as breakeven inflation expectations reached their highest levels in the past eight years, ending the quarter at 2.4%. The TIPS allocation has outperformed nominal U.S. Treasuries by roughly 1,200 bps for the previous year. We will continue to monitor inflation expectations and may increase our allocation if valuation levels move closer to historical averages.

Market Environment and Outlook

- The yield curve for U.S. Treasury securities steepened during the previous year as short-term interest rates increased by a smaller amount than long-term interest rates. Three-month U.S. Treasury Bills increased by 10 bps to 0.19% on a YOY basis while ten-year U.S. Treasuries increased by 111 bps to 1.78%.
- Inflation expectations increased by 39 bps during the quarter and by 145 bps over the previous twelve months.
- Credit markets continued to recover during the quarter with high yield corporate bond spreads tightening by 50 bps to 310 bps at the end of the quarter. High yield spreads are roughly 80 bps below their five-year average. Investment grade corporate bond spreads also tightened during the quarter, decreasing by 5 bps to 91 bps.
- Emerging Markets debt was relatively flat during the quarter with spreads decreasing by 2 bps to 279 bps. Emerging markets spreads are 378 bps tighter for the previous twelve months.
- The recovery of Commercial Mortgage Backed Securities (CMBS) was strong as securitized assets outperformed corporate credit last quarter. BBB CMBS spreads declined by 137 bps during the quarter to 336 bps. These spreads are 351 bps tighter YOY.

Conclusion

- The portfolio currently has a neutral interest rate duration to the benchmark but remains overweight to corporate and structured debt securities. This positioning increases the income of the portfolio while also increasing the potential for price volatility. The portfolio will continue to look for attractive risk-adjusted opportunities within the fixed income opportunity set.

Commentary

Objectives

Income:

The coupon of the portfolio is approximately 50 bps higher than the benchmark. Price movement has been the main driver of U.S. bond market returns for the year, but Income is the primary driver of long-term performance.

Liquidity:

26.5% of the portfolio is invested in cash, U.S. Treasuries, and TIPS. These investments can be liquidated via same-day trading.

Principal Preservation:

The portfolio has a large allocation to U.S. Treasuries and carries an investment-grade credit rating.

Diversification:

The equity beta of the portfolio is roughly 0.1 meaning that the portfolio returns have a low correlation with equity market movements.

State of Michigan Retirement System

ABSOLUTE RETURN REVIEW

State of Michigan Investment Board Meeting

June 10, 2021

Daniel J. Quigley
Senior Investment Manager
Absolute Return Strategy

EXECUTIVE SUMMARY

Performance

MPSERS Plan (3/31/21)	1-Year	3-Years	5-Years	7-Years	10-Years
Absolute Return	9.0%	5.8%	6.9%	4.5%	5.0%
HFRI FOF Conservative	10.1%	4.8%	4.6%	3.2%	3.1%

- The value of the Absolute Return portfolio is \$3.8 billion with a one-year return of 9.0%. Performance of the portfolio was positive for the first quarter across all strategies, benefiting from broader equity markets rallying and credit spreads tightening.
- Multi-Strategy and Event strategies were the largest contributors to performance for the quarter. Core Multi-Strategy managers with low volatility, high Sharpe Ratios, and low beta profiles drove performance across asset classes. This included equity activist, distressed credit, and fixed income relative value strategies. A hedge fund seeding strategy performed well as underlying managers continued to raise capital and generate strong returns. A Special Situations strategy also contributed positively, driven by an investment in growth-oriented assets as well as capital markets-oriented opportunities. Overall, Multi-Strategy managers served as effective diversifiers and reliable sources of alpha for the portfolio this quarter.
- Credit strategies also drove strong performance in the quarter. Corporate credit performance was positive, driven by broad-based spread tightening in high yield. Managers rotated out of higher dollar price, COVID-impacted credits, that have limited remaining upside. Residential Mortgage managers posted positive performance driven by spread tightening across reperforming loans, legacy mortgage-backed securities, and credit risk transfers. Performance was also supported by strong house price appreciation, additional government stimulus, stable consumer balance sheets and strong supply/demand dynamics.

Strategy Update

- The objective of the Absolute Return portfolio is to diversify the total plans' holdings, targeting returns above investment-grade fixed income with lower volatility than the equity portfolio. The portfolio utilizes a diverse mix of managers that invest both long and short to target specific exposures and seek to hedge out unwanted risk.
- Commitments closed during the quarter include:
 - \$100 million seed investment to Kayne Anderson BDC, Inc.- a direct lending strategy, focused on high quality middle market loans.
- In terms of allocation priorities, we will continue to increase exposure to high quality multi-strategy exposures, which act as a ballast to the portfolio. We will also build out equities allocations, specifically in quantitative strategies and sector-focused fundamental equity.

Overall, we will continue to focus on opportunities that seek to provide diversification, protect the downside, and deliver absolute return.

State of Michigan Retirement System

DEFINED CONTRIBUTION REVIEW

State of Michigan Investment Board Meeting
June 10, 2021

Woodrow S. Tyler
Senior Investment Manager
Defined Contribution, Trusts & Agencies Division

EXECUTIVE SUMMARY

Overview

Defined Contribution (DC) plans are participant led investments. The role of the Bureau of Investments is to offer a sufficient range of investment options which will allow participants enough choice to diversify their individual retirement accounts and construct portfolios that reasonably span the risk/return spectrum. To this end, the Plans may be comprised of at least one investment option from the categories below.

Investments Options

Tier I: Target Date Funds and Passively Managed Index Funds

- Target Date Funds (TDFs) are the default option for plan participants. Each TDF seeks to achieve its objective by investing in a set of underlying index funds representing various asset classes. Over time, the allocation to asset classes and funds change according to a predetermined "glide path" which will become more conservative as it approaches the target retirement date.
- Passively Managed Index Funds are comprised of low-cost index funds which seek to replicate the performance of a variety of cash, bond and stock indices with very little tracking error and at a low fee.

Tier II: Actively Managed Funds

- These are funds actively managed by investment managers in an attempt to outperform various cash, bond and stock indices over the long term (5+ years).

Tier III: Self Directed Brokerage Account – Non-Core Options

- TD Ameritrade provides access to a broad range of investment choices including individual stocks, bonds, CDs, over 100 commission-free ETFs, and more than 13,000 mutual funds—including more than 2,100 no-load, no-transaction-fee (NTF) mutual funds.

SOM Plans	3/31/20	3/31/21
State of Michigan 401(k)	\$5,711	\$8,100
State of Michigan 457	1,603	2,018
Pension Plus 401(k) & 457	863	1,525
EAA	9	12
Total	\$8,186	\$11,655

(\$ in millions)

Investment Selection

- The selection of each investment option for the Plans is based on the prudence standards set by the Governing Documents and applicable law, with flexibility built-in to allow a search to take full advantage of strategic opportunities. The search will focus on finding opportunities which are tailored to the Plans' specific needs. The BOI, in consultation with the Office of Retirement Services (ORS), will establish search criteria that aligns with the purpose and objective an investment option is seeking to attain. Due diligence will be completed with the goal of selecting a plan that, in the totality of circumstances, offers fair and reasonable investment options for the Plan participants.
- With respect to Tier III investments, the universe of available options is extensive. Since the selection of investments is directed solely by the participants which elect the Tier III option, the State does not provide any criteria for selecting or monitoring these non-core investment options.

Michigan DC Plan Efficient Frontier
Target Date & Select Core Funds Plotted

Source: State Street analysis based on information provided by plan sponsor, as of April 2019.

Market Environment and Outlook

Significant progress in vaccination programs, states reopening, combined with still very accommodative government policy along with the release of massive pent-up demand from excess consumer savings is expected to drive economic growth through the remainder of 2021.

The benefits of a strengthening economy led to improved earnings 4Q20 which has carried into 1Q21 and is expected to persist through the remainder of the year. While equity returns were mostly driven by defensive, pandemic growth stocks for the better part of 2020, the prospects of a continued strong economy have helped cyclical areas of the equity market since the announcements of the approval of several vaccinations back in early November 2020.

For the first quarter, the S&P 500 index gained 6.2% and the Dow Jones Industrial Average increased by 6.4%. By market capitalization, small and mid-cap stocks performed even better, with the S&P Midcap Index gaining 13.5% while the Russell 2000 small cap index gained 12.7%. Non-U.S. markets, as measured by the MSCI EAFE index, gained 0.03% while the MSCI Emerging Markets index returned 2.3%.

The prospects of the strengthening economy resulted in rising inflation expectations causing a corresponding increase in interest rates. As a result, bond returns were negative over the quarter. The Bloomberg Barclays U.S. Aggregate Bond index lost 3.4% while the U.S. High Yield index gained 0.8% in the same period. Longer duration bonds suffered the most, as the Bloomberg U.S. Intermediate Bond index return was -1.6% while the Bloomberg U.S. Treasury Long-Term Bond Index return was -13.4%.

DC Plan news on SECURE Act 2.0

The House Ways and Means Committee is considering a bill called the Securing a Strong Retirement Act of 2021. This comes less than a year and a half after passage of another major retirement savings bill called the SECURE Act of 2019 and it is meant to build upon several of its ideas.

This bill has broad bipartisan support and is expected to pass later this year. Several of the key provisions in the bill:

- **Treatment of student loan payments as elective deferrals for purposes of matching contributions-** an employer under the bill would be permitted to make matching contributions under a 401 (k) or 403 (b) plan, to “qualified student loan payments”. The idea is that employees who are overwhelmed with student debt may not realistically be able to save for retirement.
- **Enhancement of 403(b) plans-** these plans have been generally limited to annuity contracts and mutual funds. Under the legislation, these plans would be permitted to invest in collective investment trusts.
- **Increase in age for required beginning date for mandatory distribution-** under current law, participants are generally required to begin taking distributions from their retirement plans at age 72. The legislation would increase the required minimum distribution age further to 75.
- **Higher catch-up contribution to apply at age 60-** the limit on catch-up contributions for 2020 is \$6,500, except in the case of SIMPLE plans, which is \$3,000. The legislation would increase these limits to \$10,000 and \$5,000.
- **Remove required minimum distribution barriers for life annuities-** the legislation would eliminate certain barriers to the availability of life annuities in qualified plans and IRAs
- **Qualifying longevity annuity contracts-** qualifying longevity annuity contracts (QLACs) have been limited to no more than 25% of investment or \$135,000. Now the 25% limit has been eliminated and the \$135,000 has been increased to \$200,000

BASKET CLAUSE REVIEW

State of Michigan Investment Board Meeting
June 10, 2021

Karen M. Stout, CPA, CGFM
Administrator
Trust Accounting Division

SMRS

Basket Clause Investments

3/31/21

<u>Asset Class</u>	<u>Value</u>
Total Absolute Return	\$ 3,787,128,231
Total Real Return and Opportunistic	764,516,635
Total Fixed Income	<u>72,263,512</u>
Total Basket Clause Investments	<u><u>\$ 4,623,908,378</u></u>

The basket clause investments on March 31, 2021, were \$4.6 billion or 5.3% of the total portfolio value of \$87.7 billion.

The Public Employees Retirement System Investment Act, 1965, PA 314, MCL 38.1132 *et seq*, authorizes the State Treasurer to invest up to 30% of the system's assets in investments "not otherwise qualified under the act." MCL 38.1140d (1) commonly referred to as Section 20d (after the authorizing section of PA 314) or Basket Clause investments, gives the State Treasurer the flexibility to take advantage of market opportunities not specifically authorized in PA 314 while conserving protections against imprudent investment.
